## AGGIUNGERE MODULO ATTUATORE A00930201 Base

Toccare la parte bassa del touch screen

Premere il pulsante Configurazione

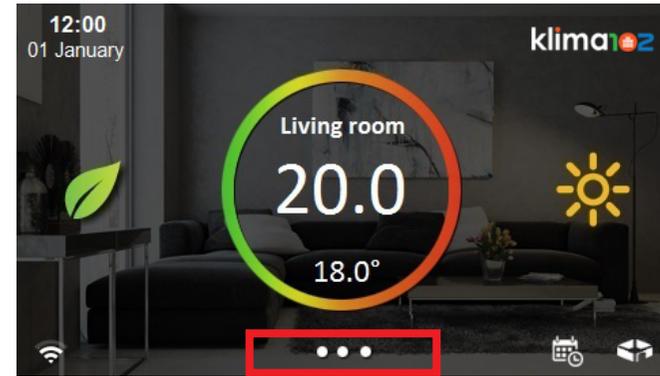

Entrare in Installazione

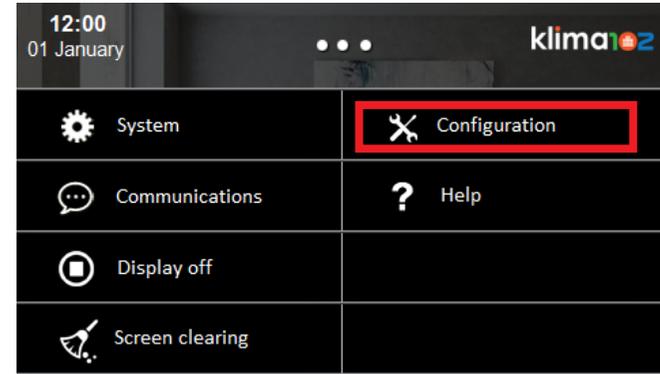

## ADDING THE A00930201 Base ACTUATOR MODULE

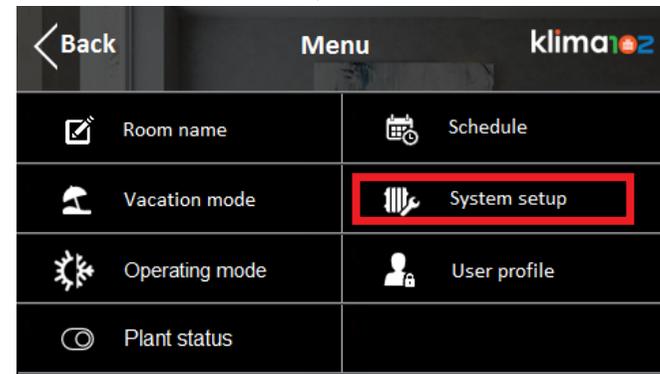

Touch the bottom of the screen

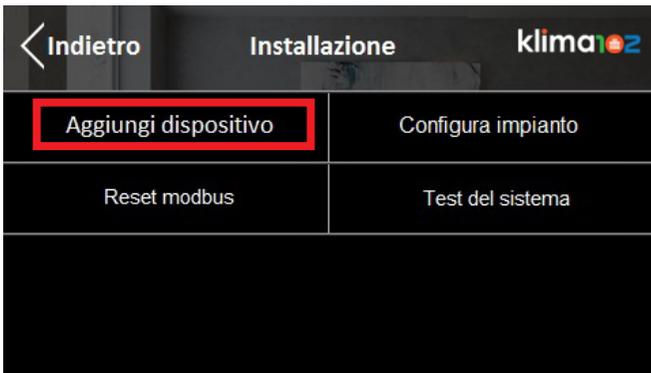

Press Configuration

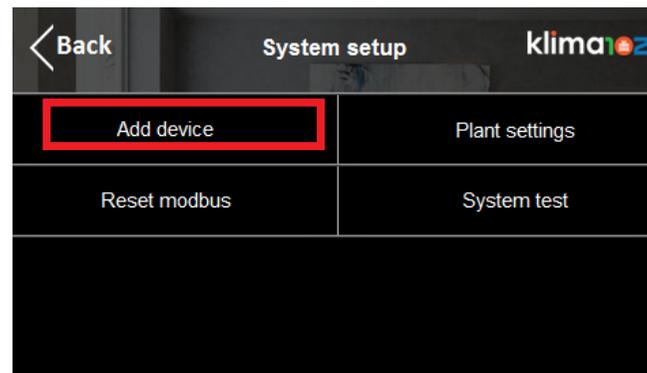

Press System setup

Entrare in Aggiungi dispositivo

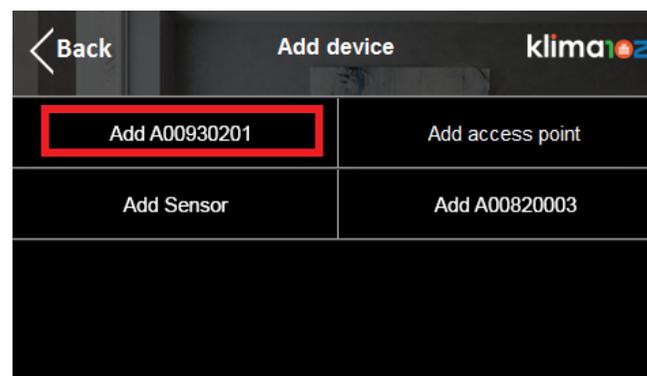

Press Add Device

Premere Aggiungi A00930201 Base

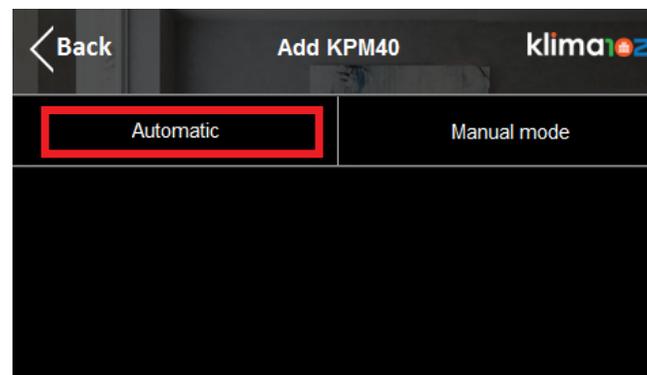

Press Add A00930201 Base

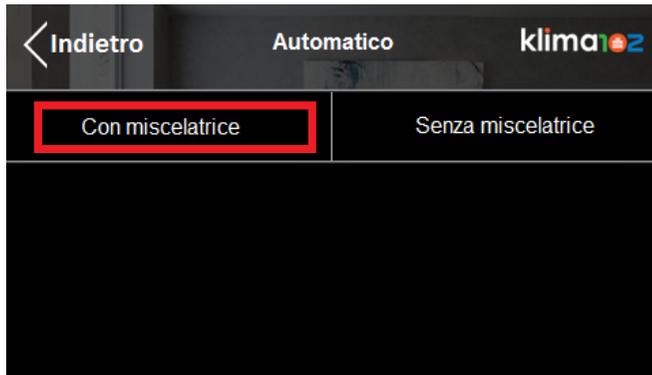

Premere Automatico

Press Automatic

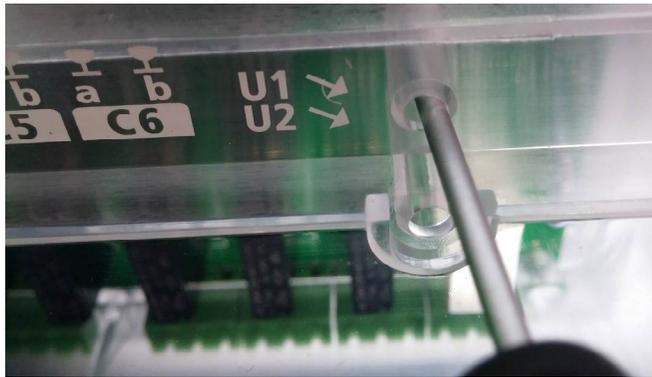

Premere Con miscelatrice o Senza miscelatrice in base alla necessità

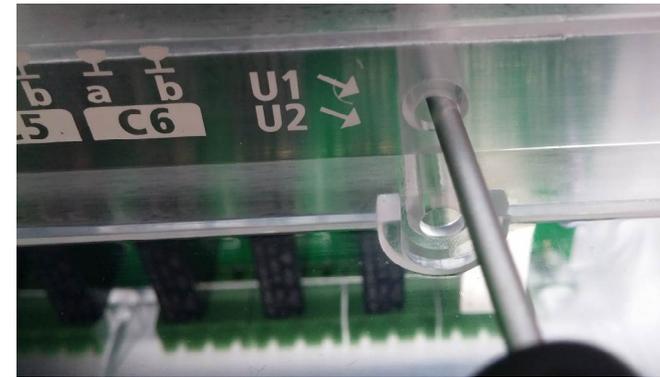

Press KPM40 with or without mixer according to the system type

Recarsi al A00930201 Base e premere il pulsante U1 per avviare la sincronizzazione

Go near the A00930201 Base and press the button U1 to start the synchronization

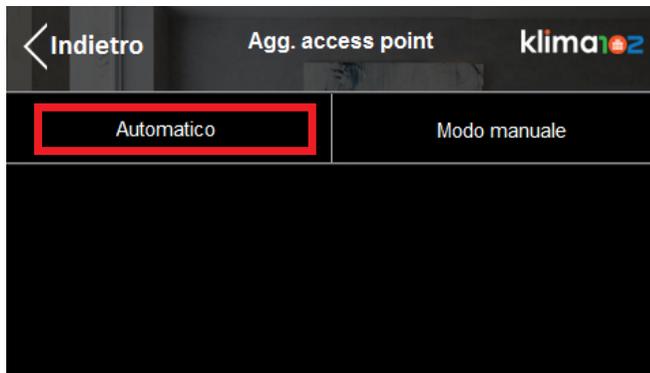

## AGGIUNGERE SENSORE DI TEMPERATURA/UMIDITA'

Dopo la sincronizzazione con il A00930201 Base è possibile sincronizzare anche i sensori Premere Agg. Access Point per aggiungere il sensore A00920201 Access Point

Premere Automatico

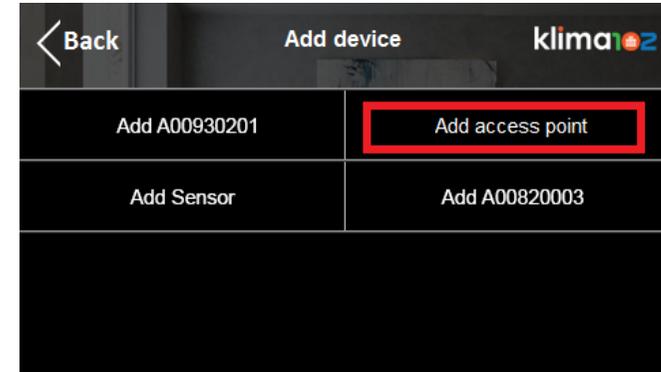

Recarsi al sensore A00920201 e premere il pulsante "A", il led rosso lampeggerà e la sincronizzazione sarà terminata

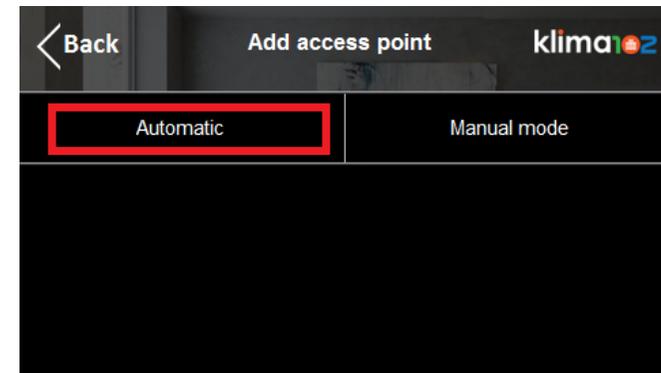

## ADDING TEMPERATURE/HUMIDITY SENSOR

After synchronizing with the A00930201 Base, the sensors can also be synchronized Press Add Access Point to add the A00920201 Access Point sensor

Press Automatic

Go near the A00920201 sensor and press the "A" button, the red LED will flash and the synchronization will be terminated

Dopo aver aggiunto l'Access Point è possibile aggiungere altri sensori K410W.

Entrare in Aggiungi K410W per aggiungere altri sensori K410WY002 o K410WY003

Premere Automatico

Recarsi al A00930201 Base effettuare le seguenti operazioni per sincronizzare il sensore

- 1) Selezionare il relè da associare al sensore premendo il pulsante U2
- 2) Mantenere premuto per 2 sec. il tasto U2 per salvare l'associazione
- 3) Premere più volte il tasto U2 per spostarsi oltre l'uscita n°8, si spegneranno tutti i LED, quindi tenere premuto per 2 sec. il pulsante U2 per salvare tutto e terminare l'impostazione.

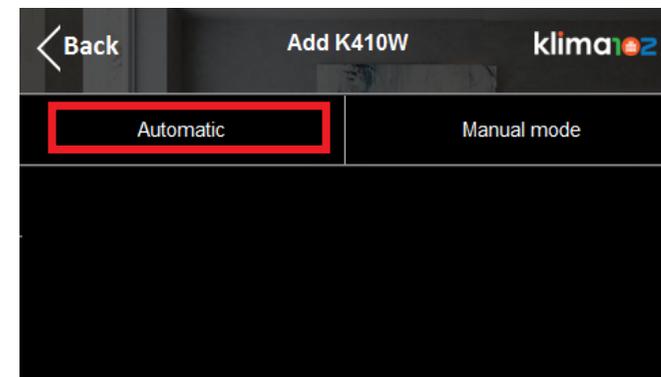

After adding the Access Point, the other additional K410W sensors can be added.

Press Add K410W to add other K410WY002 or K410WY003 sensors

Press Automatic

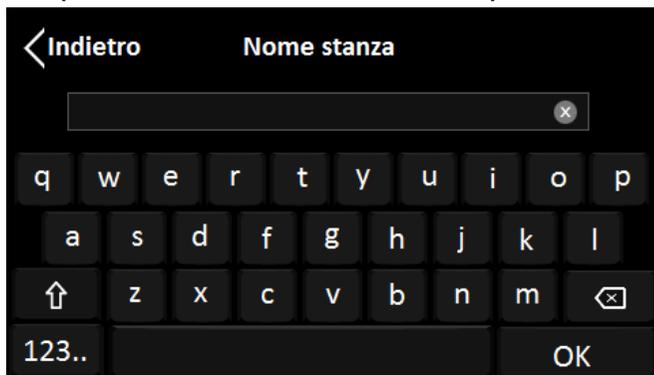

Go near the A00930201 Base and do the following operations to synchronize the sensor:

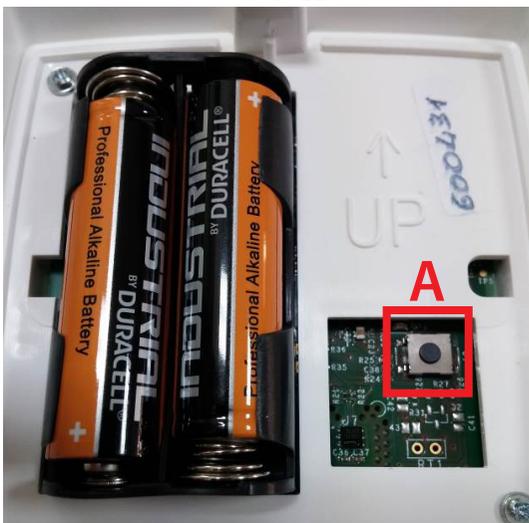

- 1) Select the relay to be associated with the sensor by pressing the U2 button
- 2) Keep pressed for 2 seconds the U2 button to save the association
- 2) Press the U2 button repeatedly to move past output 8, all LEDs will turn off, then press and hold for 2 seconds the U2 button to save everything and finish the setting.

Successivamente è possibile inserire il nome del locale dove è posizionato il sensore ...

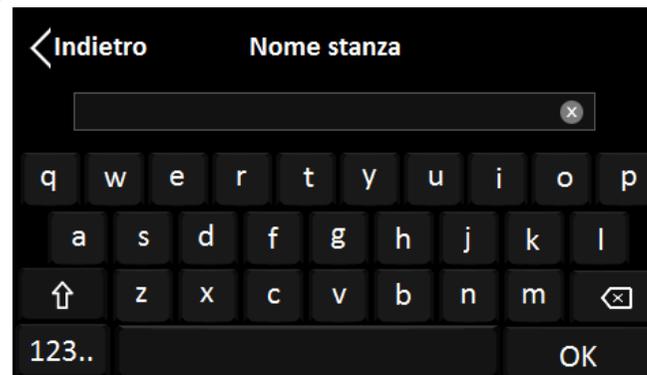

...ed associare il sensore alla stanza premendo il pulsante "A", il LED rosso lampeggerà

È necessario ripetere questa procedura fino al completamento delle associazioni uscite-sensori, fino a un massimo di 4 A00930201 con o senza miscelatrice.

Then is possible to enter the name of the room where the sensor is located...

... and associate the sensor to the room by pressing the "A" button, the red LED will flash

It is necessary to repeat this procedure until the output-sensor associations are completed, up to a maximum of 4 A00930201 with or without mixer.

## AGGIUNGERE MODULO ATTUATORE A00820003 Air

È possibile aggiungere fino a 4 moduli A00820003 Air.

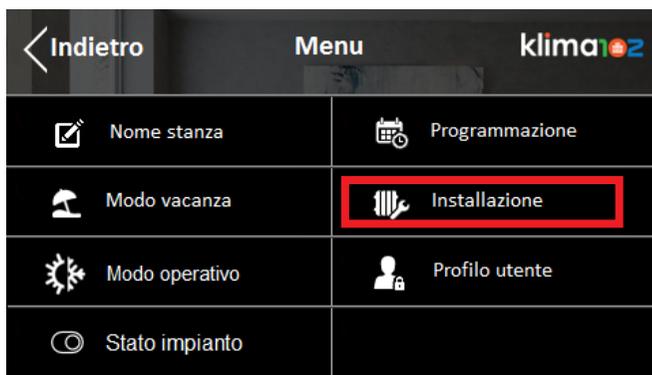

Toccare la parte bassa del touch screen

Premere il pulsante Configurazione

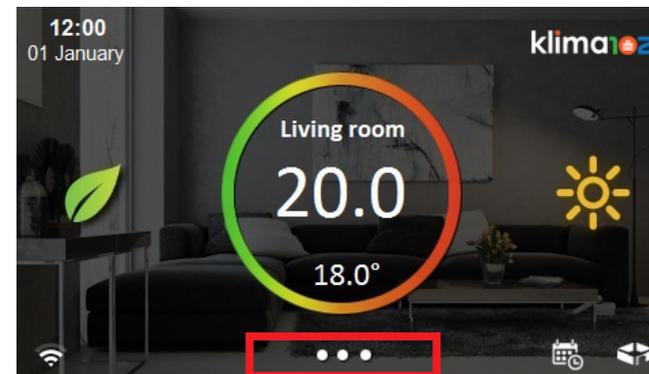

Entrare in Installazione

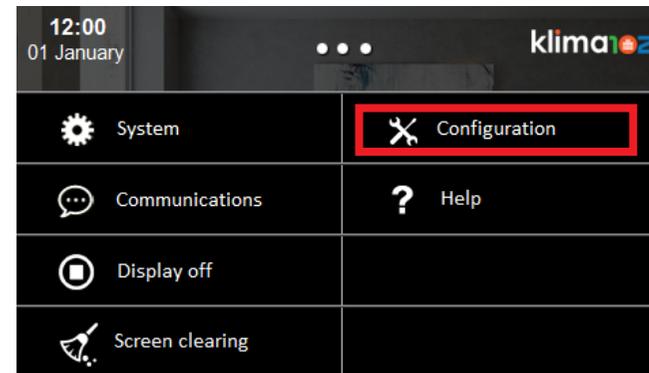

## ADDING THE A00820003 Air ACTUATOR MODULE

Is possible to add up to 4 A00820003 Air modules.

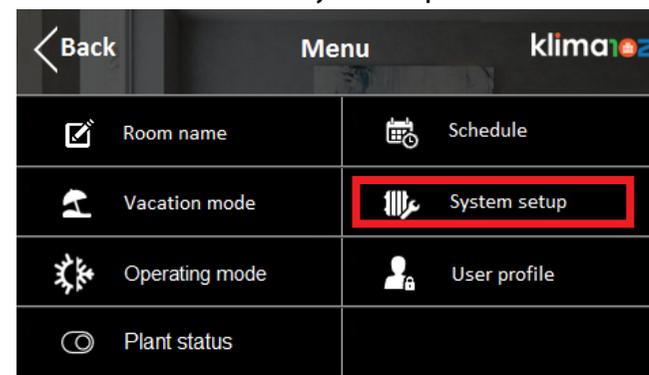

Touch the bottom of the screen

Press Configuration

Press System setup

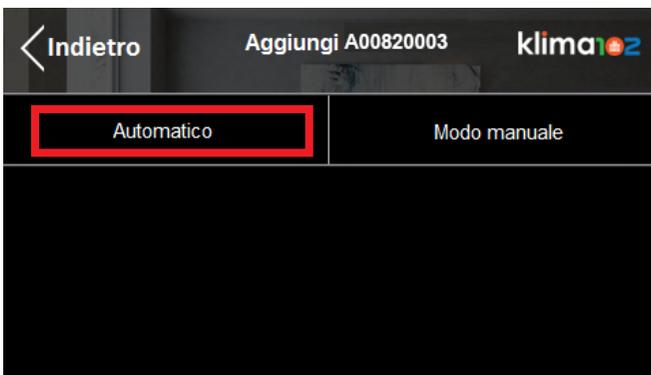

Entrare in Aggiungo dispositivo

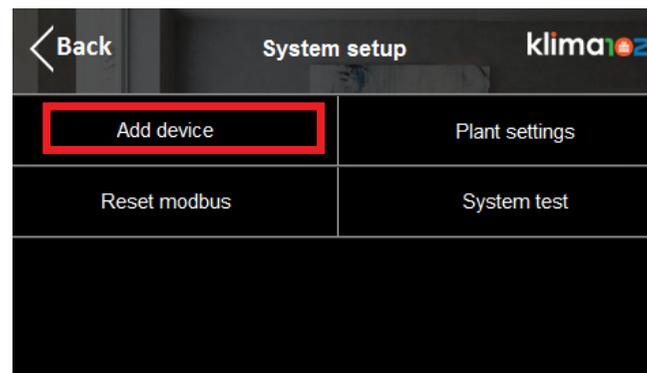

Premere Aggiungo A00820003

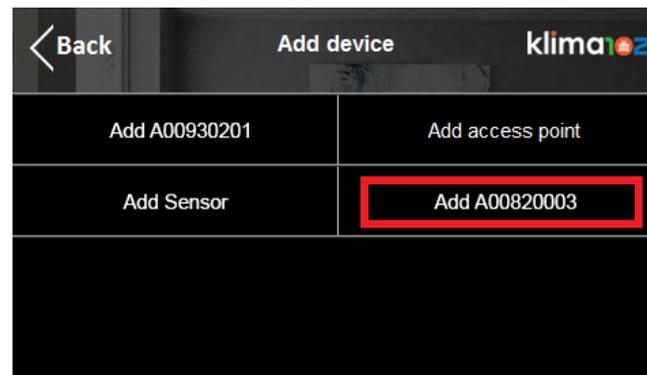

Premere Automatico

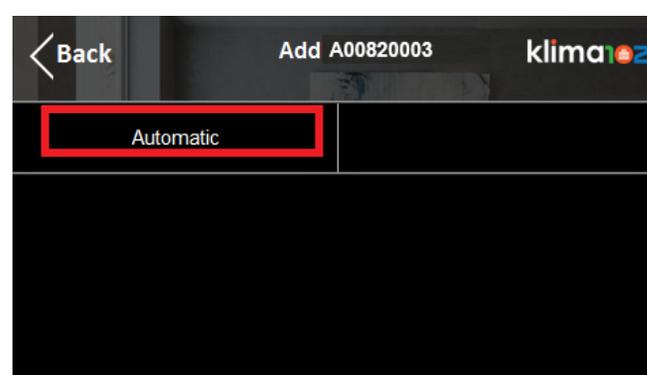

Press Add Device

Press Add A00820003

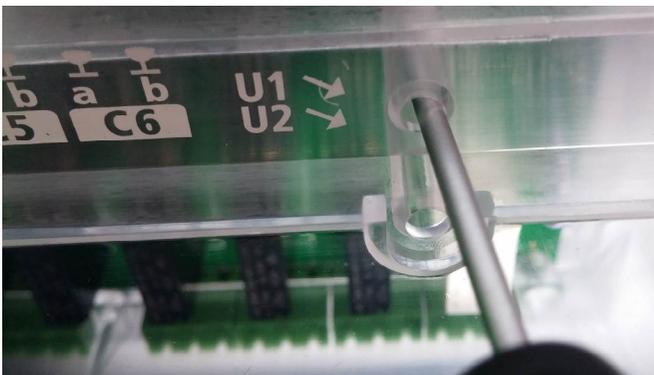

Press Automatic

Selezionare la stanza o più stanze desiderate (massimo 6)  
che comanderanno il modulo A00820003 Air

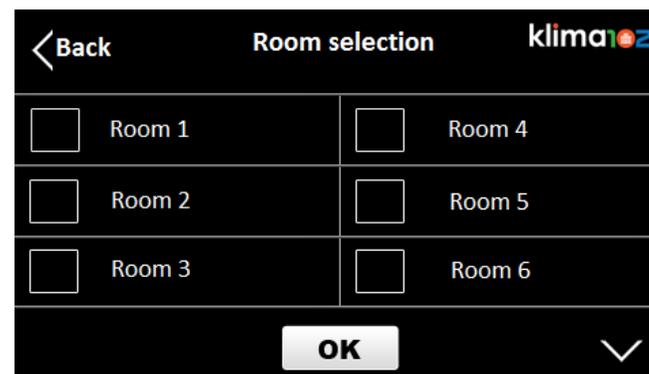

Recarsi al KPM45 Air e premere il pulsante U1 per avviare la sincronizzazione

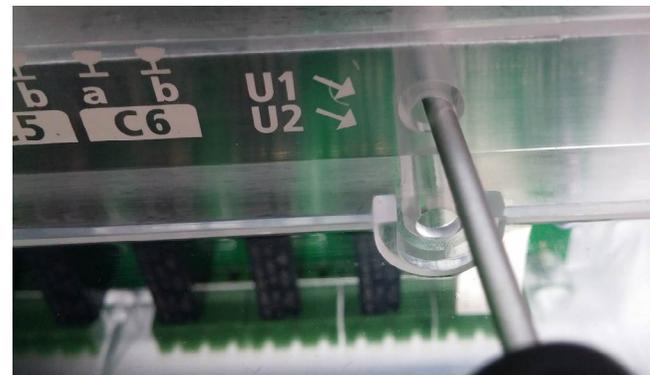

Successivamente premere Stato Impianto per avviare il sistema  
che inizierà a comunicare i dati tra i dispositivi installati

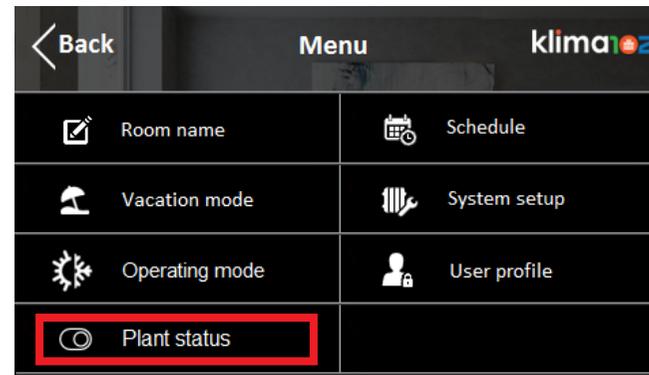

Select the desired room or more rooms (maximum 6)  
that will control the A00820003 Air module

Go near the KPM45 Air and press the U1 button to start the synchronization

Then press System Status to start the system  
that will begin to communicate data between the installed devices

## CAMBIO DI STAGIONE

È possibile cambiare la stagione direttamente dal display del A00910001.

Toccare la parte bassa del touch screen

Premere il pulsante Configurazione

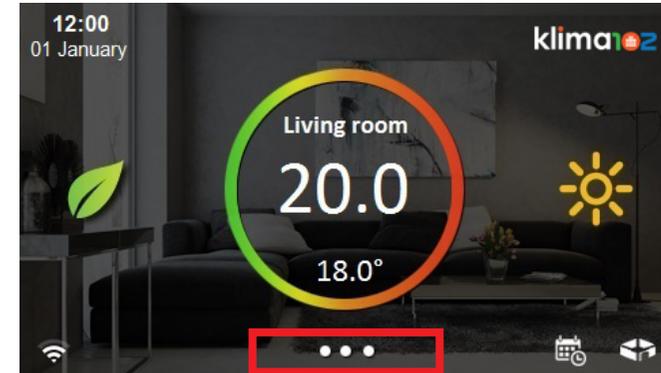

Entrare in Modo Operativo

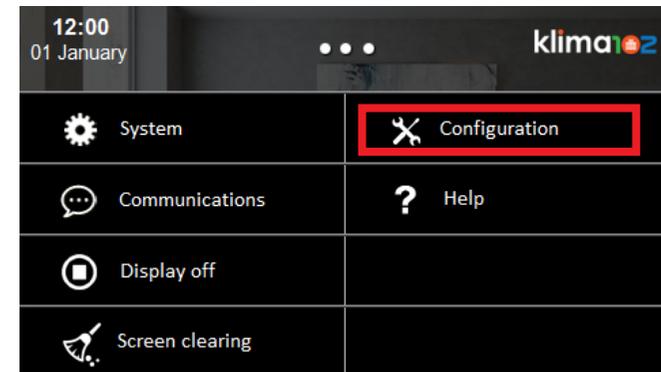

## SEASON CHANGE

Is possible to change the season directly from the display of the A00910001.

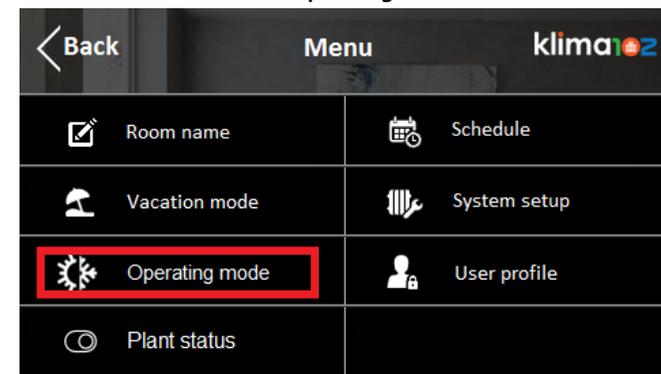

Touch the bottom of the screen

Press Configuration

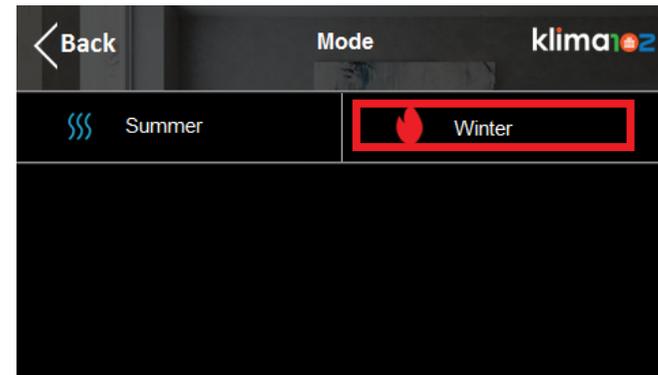

Press Operating mode

Selezionare la stagione desiderata e confermare

Select the desired season and confirm

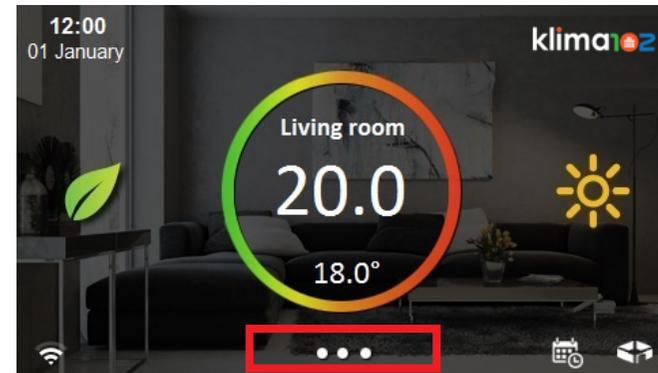

### IMPOSTAZIONE PROGRAMMI CRONO

Toccare la parte bassa del touch screen

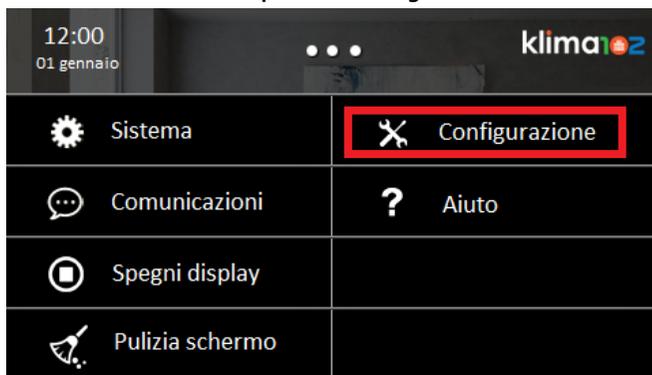

### SETTING CHRONO PROGRAMS

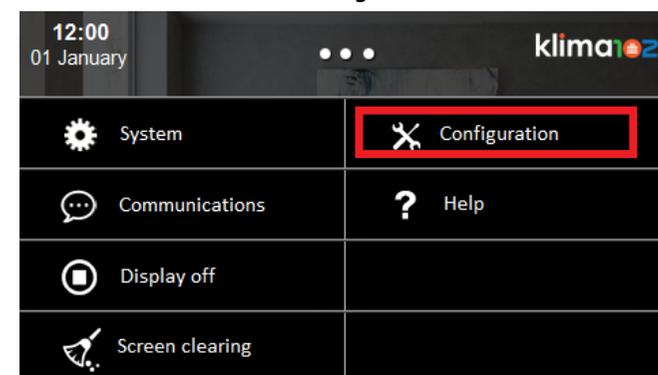

Touch the bottom of the screen

Premere il pulsante Configurazione

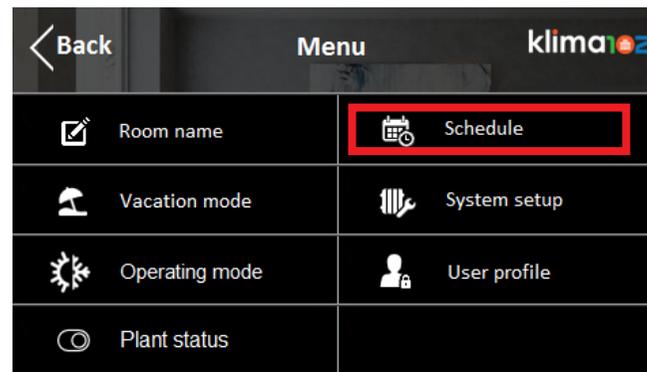

Press Configuration

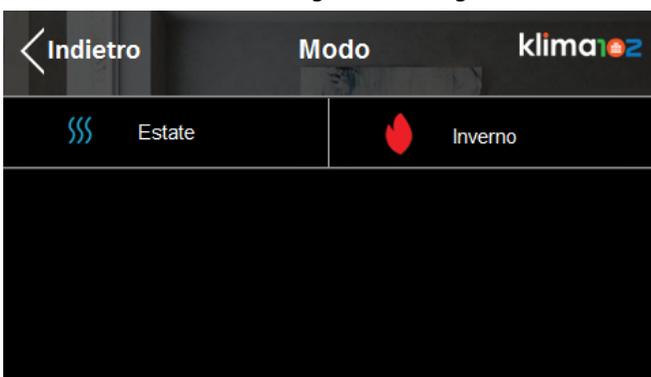

Premere il pulsante Programmazione

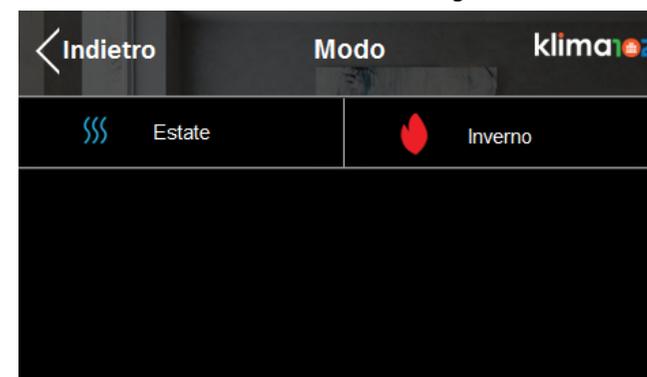

Press Schedule

Selezionare la stagione da configurare

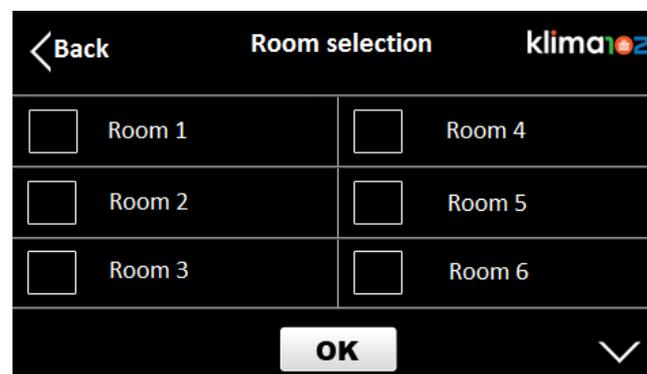

Select the season to be configured

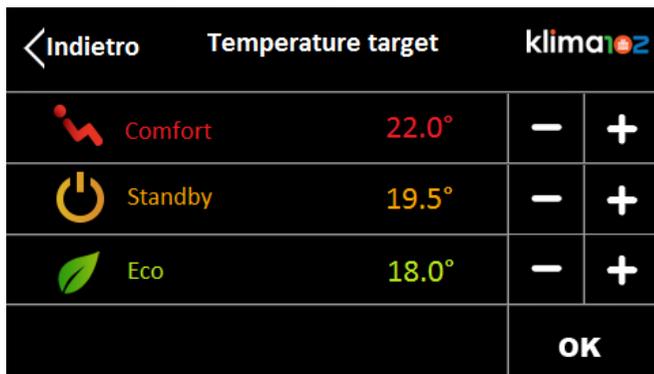

Selezionare la stanza o più stanze desiderate

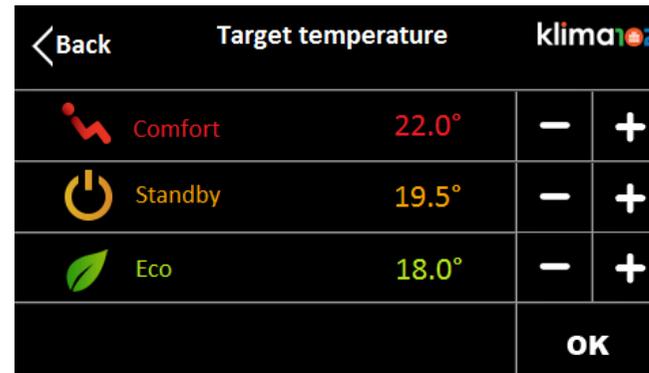

Select the desired room or rooms

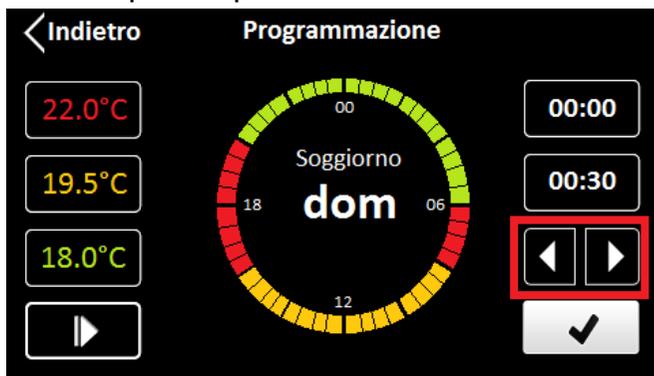

Impostare le 3 temperature desiderate

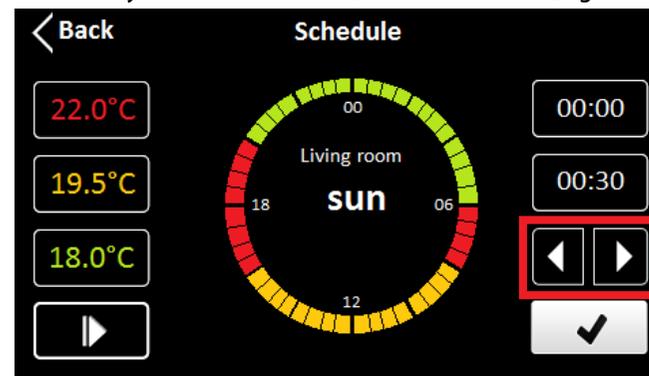

Set the 3 desired temperatures

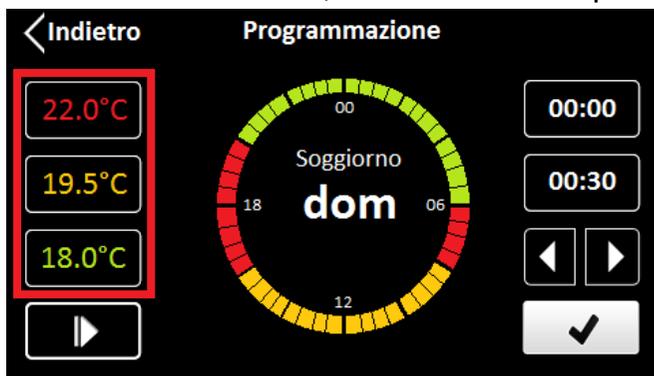

Nella Programmazione è possibile spostare il cursore nelle 24h con le frecce destra/sinistra

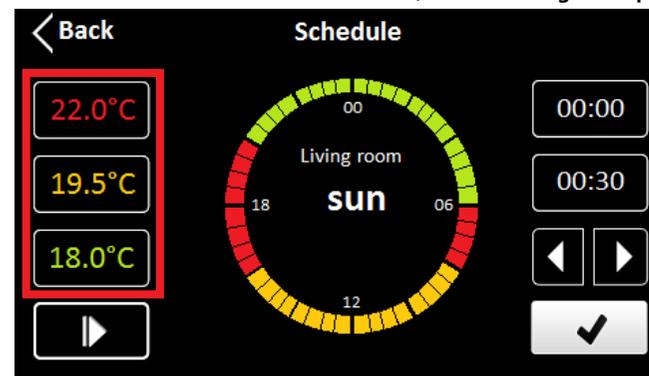

In Schedule you can move the indicator in 24h with left/right arrow

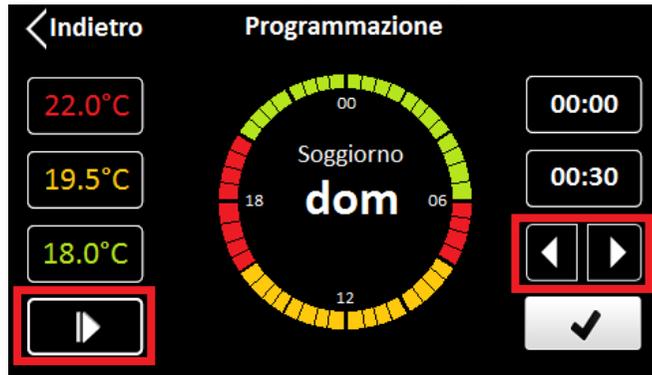

Posizionato il cursore nell'orario desiderato, selezionare una delle temperature di target

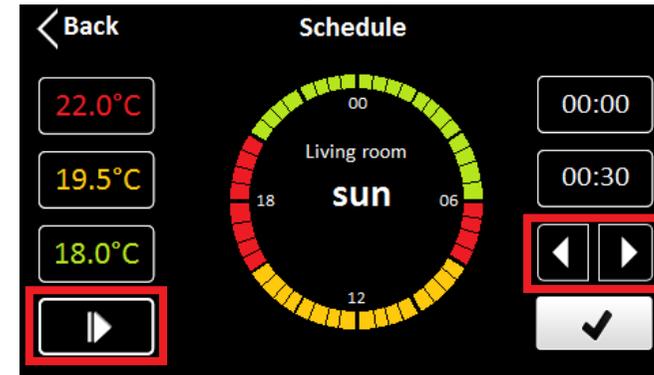

When the indicator is in the desired timetable, select the target temperature

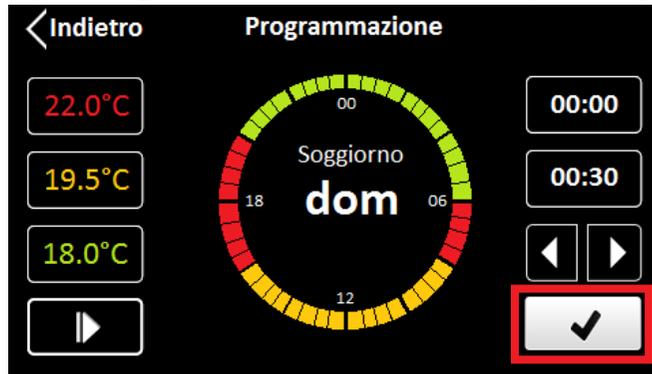

È possibile allungare la fascia desiderata premendo le frecce destra/sinistra oppure togliere la selezione della temperatura di target con la freccia sottostante

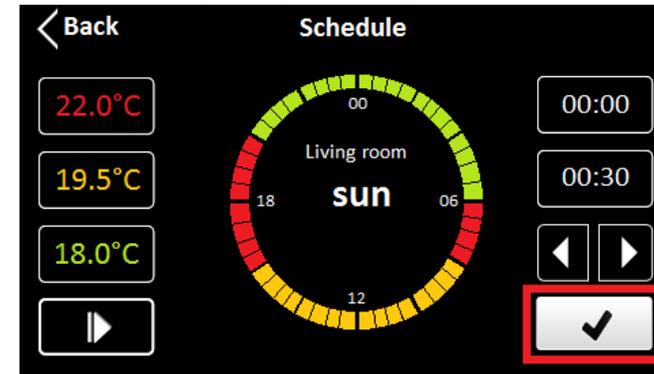

It is possible to length the desired band by pressing the left/right arrow or stop the selection of the target temperature with the below arrow

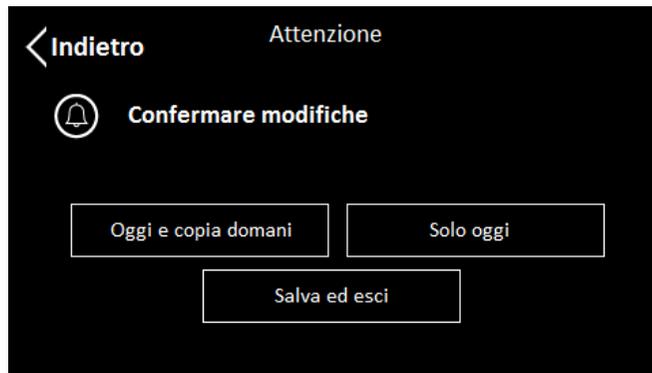

Una volta impostata la giornata con le fasce orarie desiderate, premere il pulsante OK

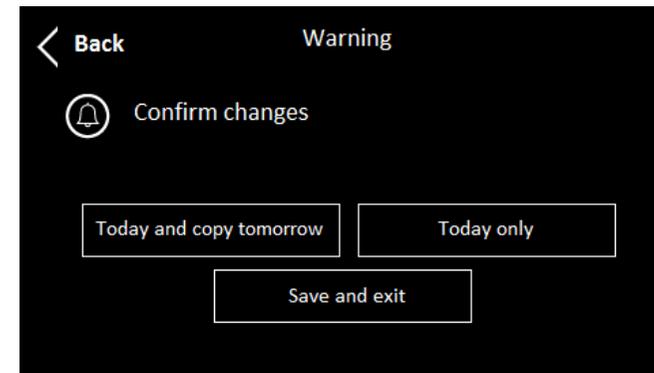

After setting the day timetable, press the OK button

A questo punto è possibile salvare e copiare le fasce orarie al giorno successivo, salvare e passare al giorno successivo, salvare ed uscire alla schermata principale

Now it's possible to save and copy the timetable to the next day, save and go to the next day, save and exit to the main screen

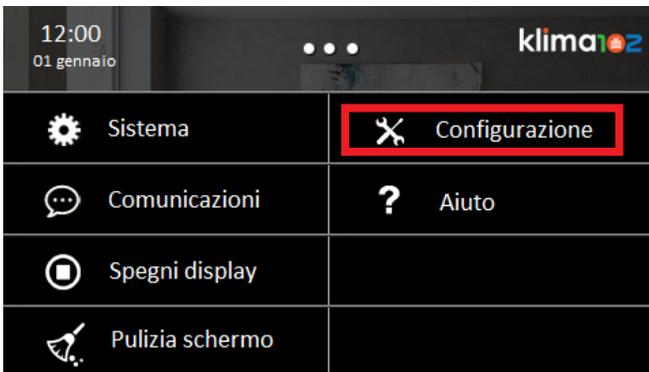

## MODALITA' VACANZA

È possibile portare tutte le stanze in OFF antigelo con la funziona vacanza.

Toccare la parte bassa del touch screen

Premere il pulsante Configurazione

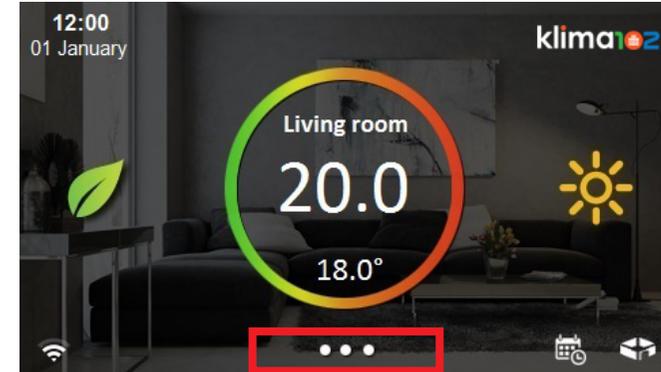

Premere il pulsante Modo vacanza

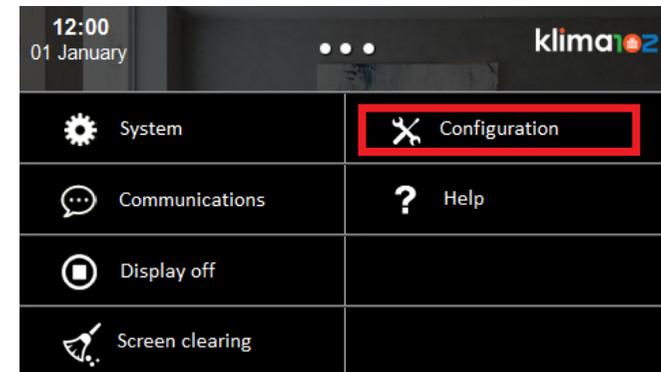

## VACATION MODE

With VACATION mode you can set all the rooms in OFF-antifreeze operation.

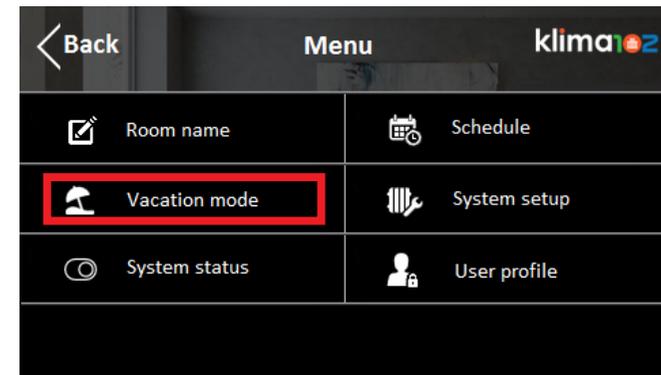

Touch the bottom of the screen

Press Configuration

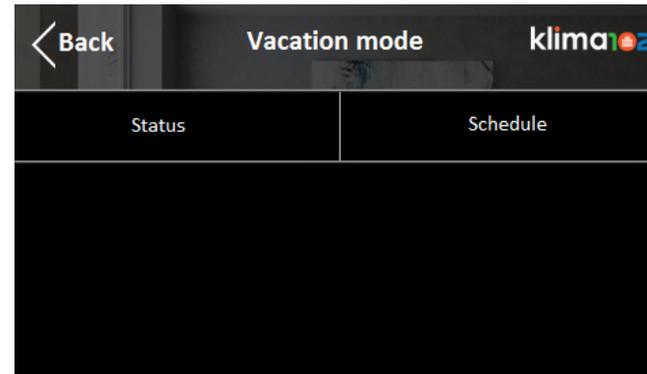

Press Vacation mode

Scegliere come abilitare la funzione Vacanza e il Tipo

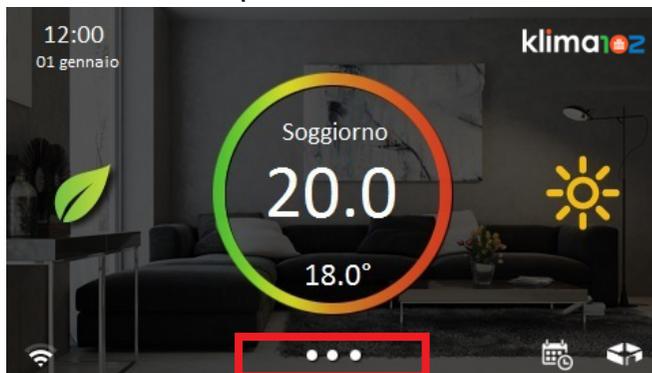

Choose how to enable the Vacation function and the Type

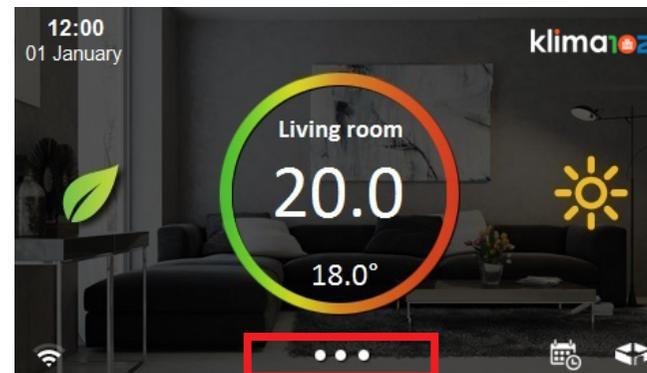

### CAMBIO NOME STANZA

Toccare la parte bassa del touch screen

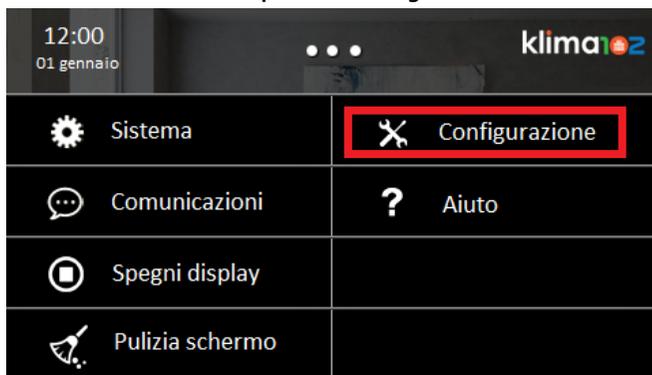

### CHANGING ROOM NAME

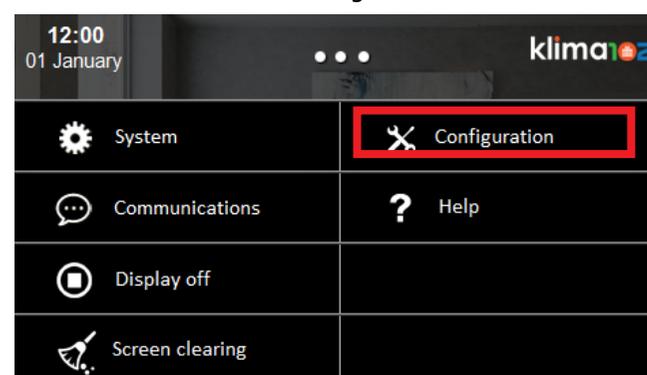

Touch the bottom of the screen

Premere il pulsante Configurazione

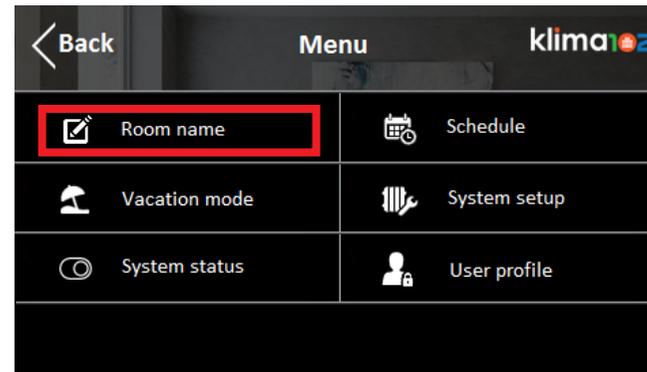

Press configuration

Premere il pulsante Nome stanza

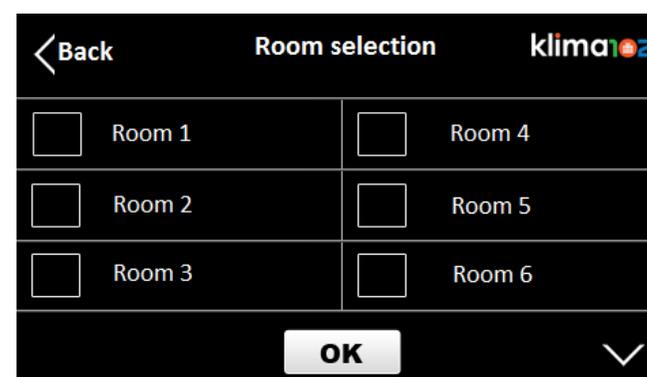

Press Room name

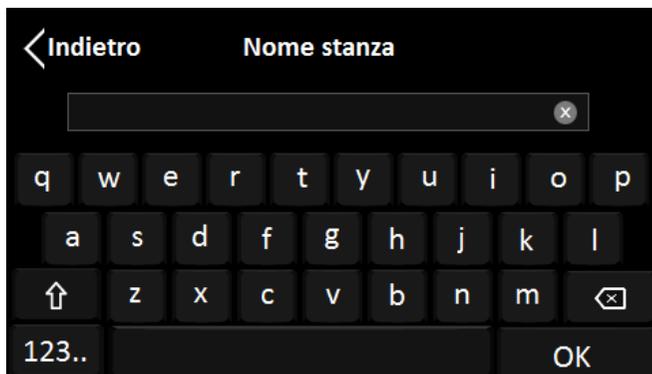

Selezionare la stanza desiderata

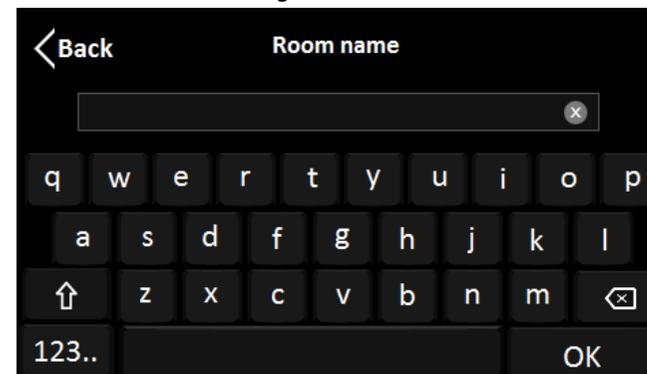

Select the desired room

Modificare il nome della stanza

Change the room name

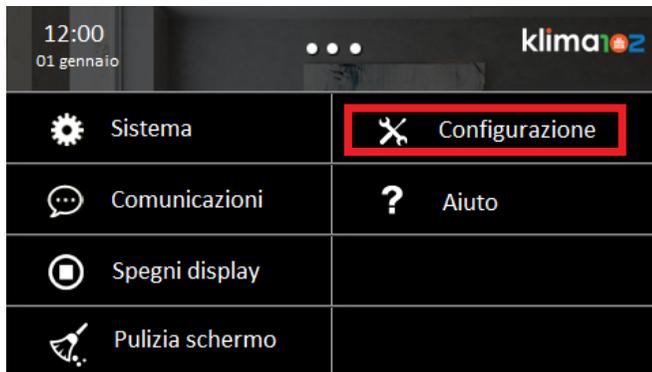

## BLOCCO PASSWORD

È possibile bloccare la parte di Programmazione e dei Parametri mettendoli sotto password.

Toccare la parte bassa del touch screen

Premere il pulsante Configurazione

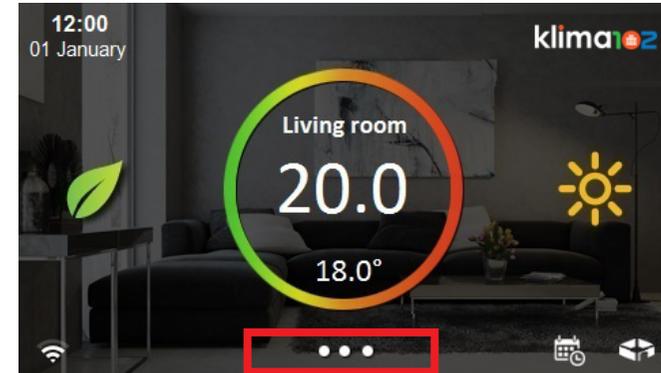

Premere il pulsante Profilo utente

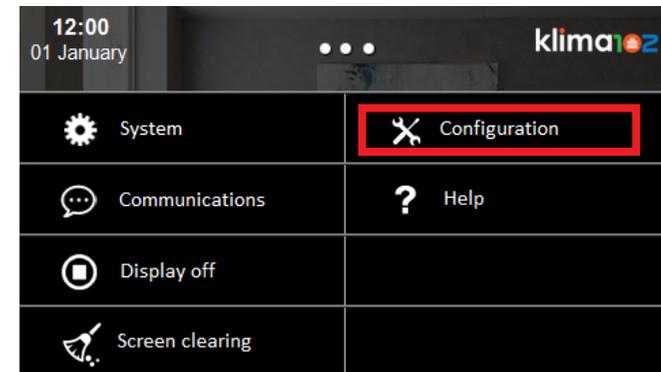

## PASSWORD LOCK

By setting a password you can lock the Schedule menù and parameters.

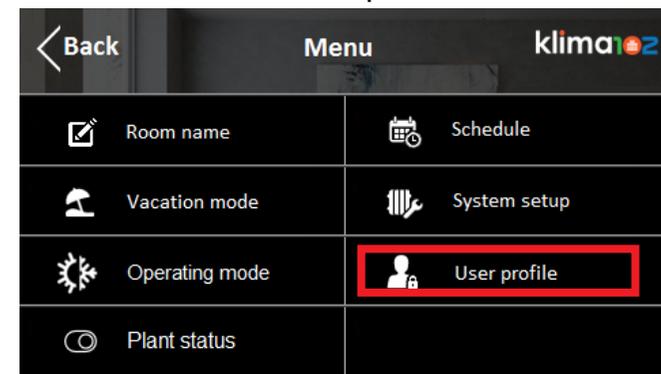

Touch the bottom of the screen

Press Configuration

Press User profile

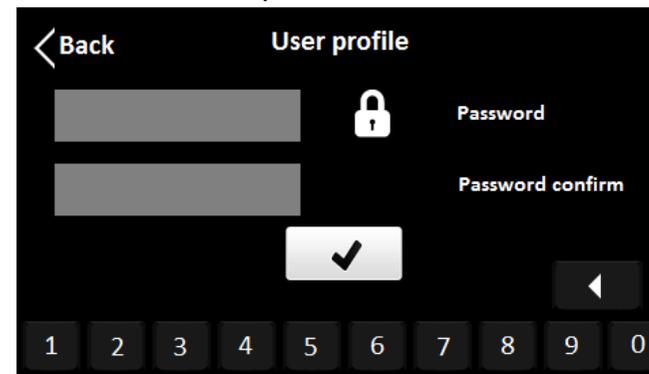

Inserire password e confermarla

Per sbloccare il dispositivo reimmettere la password

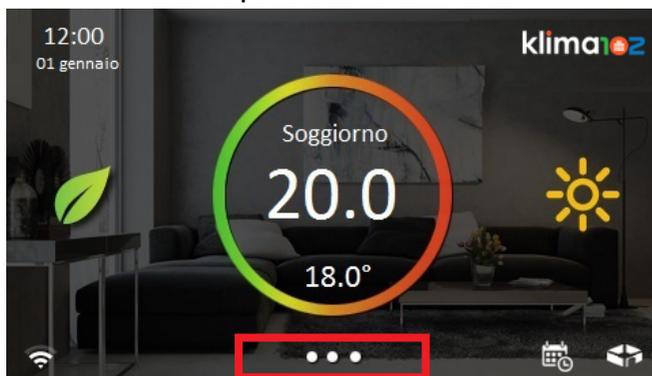

Insert password and confirm

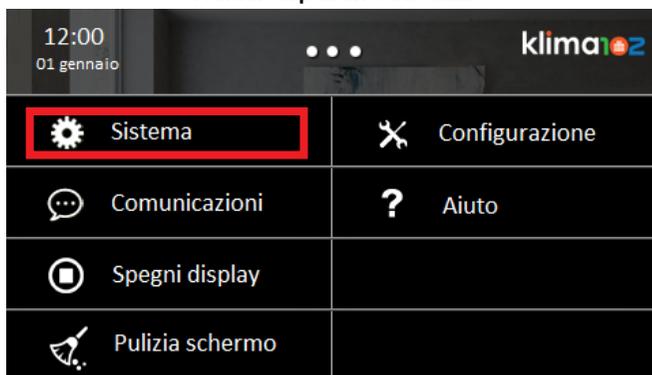

To unlock the device enter your password again

### CONFIGURAZIONE WIFI

Toccare la parte bassa del touch screen

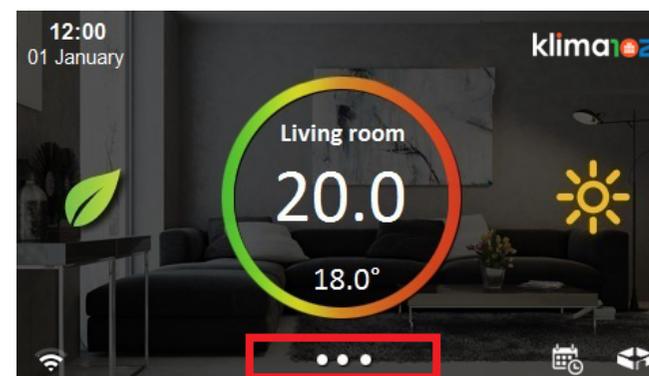

Premere il pulsante Sistema

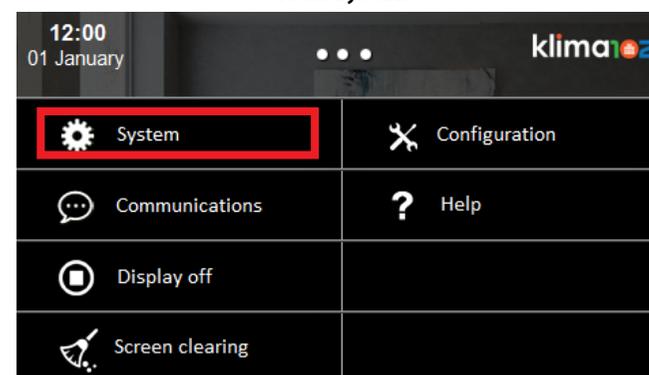

### WIFI CONFIGURATION

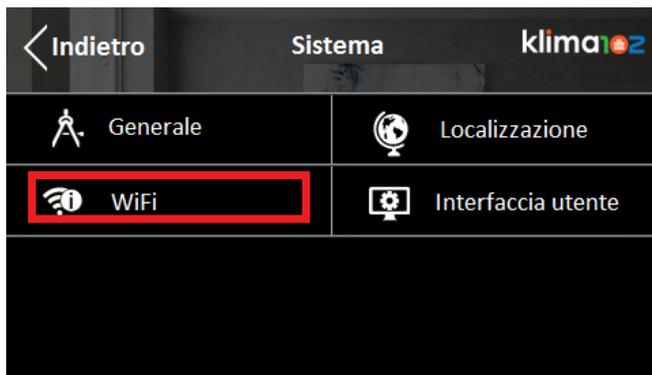

Touch the bottom of the screen

Press System

### Premere WiFi

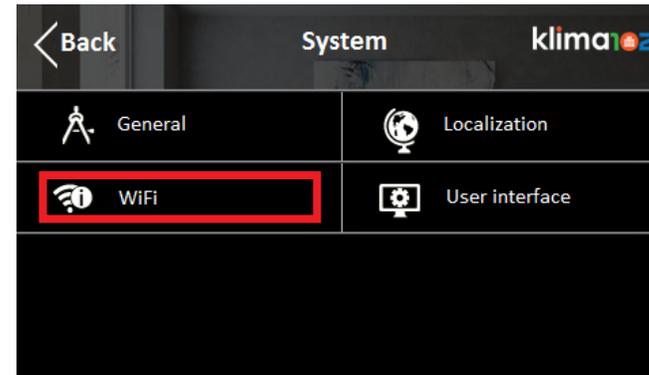

### Premere Scansione reti e selezionare la rete desiderata

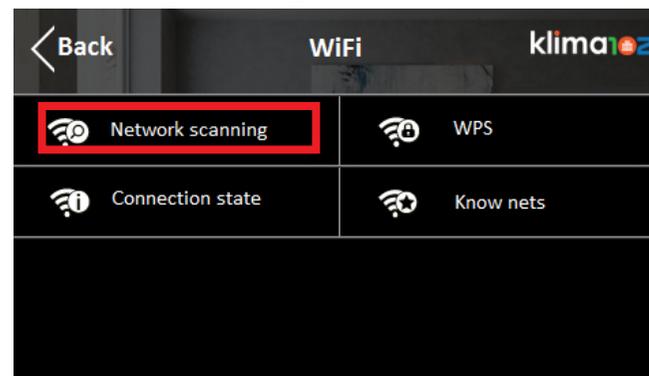

Oppure se si è provvisti di modem con tecnologia WPS, premere WPS sia sul display sia sul modem, per la sincronizzazione automatica

### Press WiFi

### Press Network scanning and select the desired network

Or if you have a modem equipped with WPS, press the button WPS on and on the modem. The modem will automatically sync

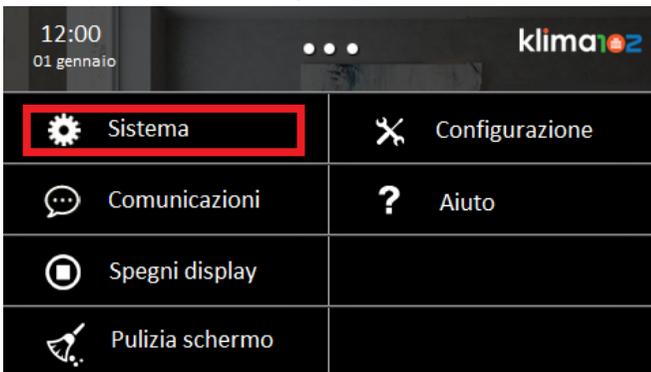

## METEO TEMPO REALE

Dopo la connessione WiFi è possibile avere nella schermata principale il meteo in tempo reale inserendo il CAP.

Toccare la parte bassa del touch screen

Premere il pulsante Sistema

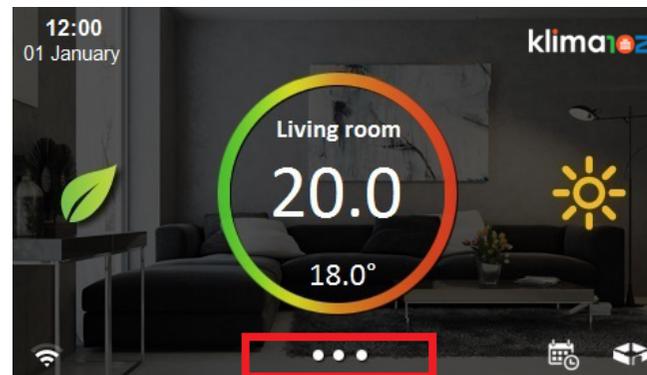

Premere Localizzazione

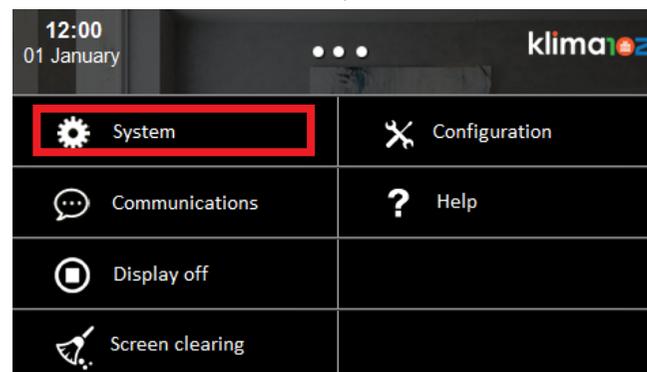

## REAL-TIME WEATHER

After the WiFi connection, you can see on the main screen the real-time weather localized by a ZIP code.

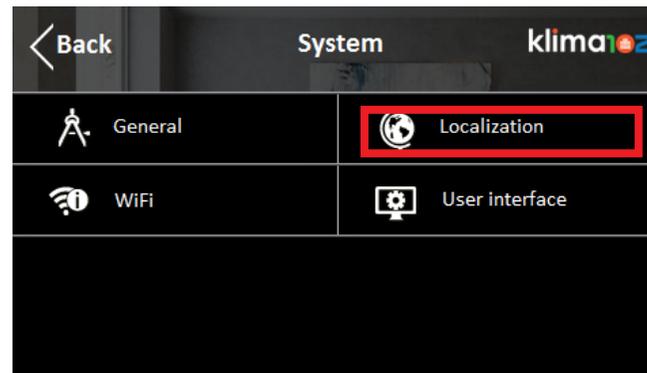

Touch the bottom of the screen

Press System

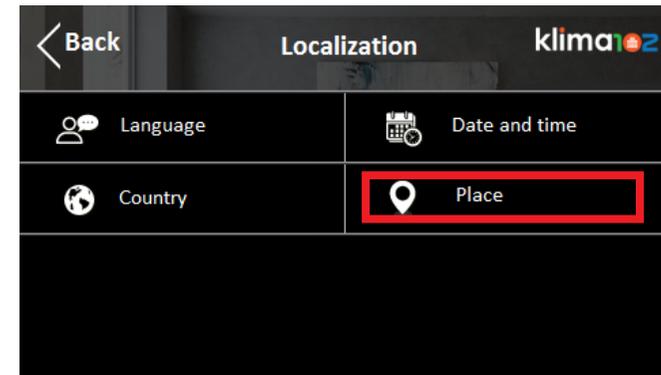

Press Localization

### Premere Località

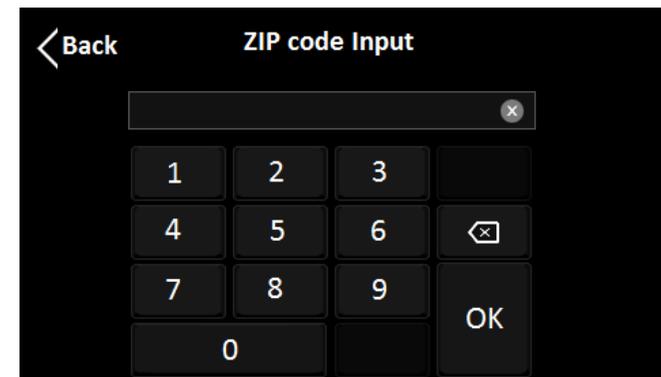

### Press Place

### Inserire il CAP

### Insert ZIP code

### CAMBIO DATA E ORA

Se non si dispone della connessione WiFi per cambio data ed ora automatico è possibile modificarla a mano.

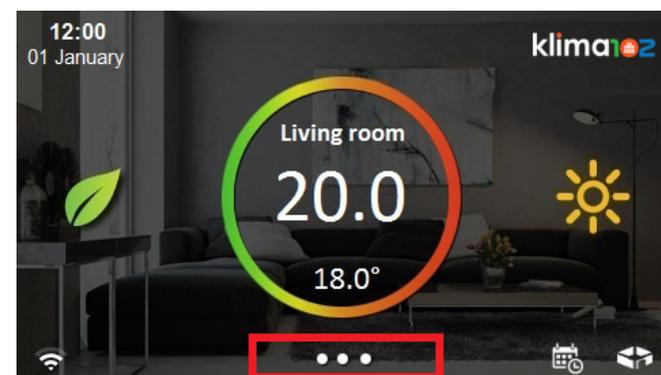

Toccare la parte bassa del touch screen

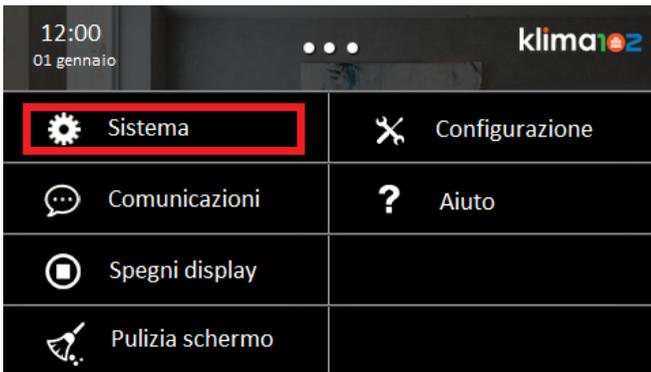

### CHANGING DATE AND TIME

If you don't have WiFi connection for data transmission and automatic setup of the date and time, you can edit manually.

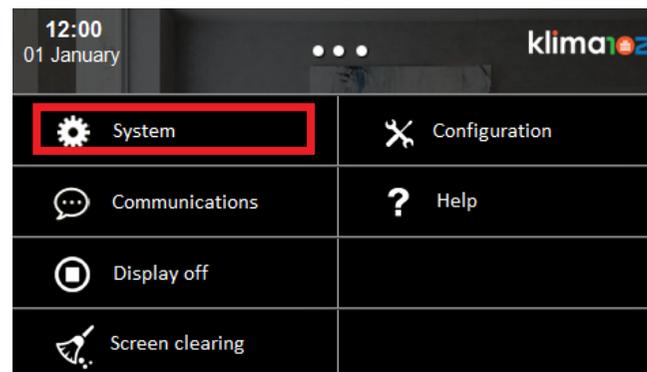

Touch the bottom of the screen

### Premere il pulsante Sistema

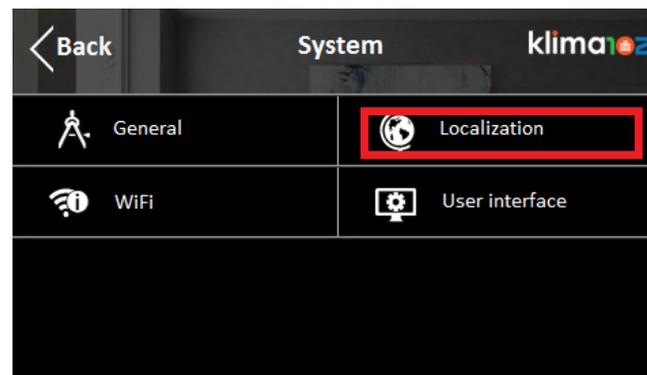

### Press System

### Premere Localizzazione

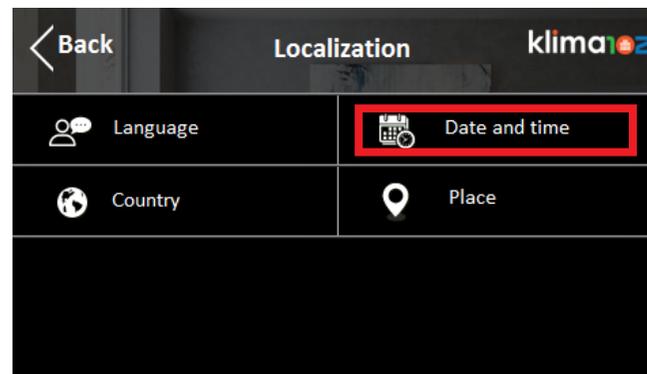

### Press Localization

### Premere Data e ora

### Press Date and Time

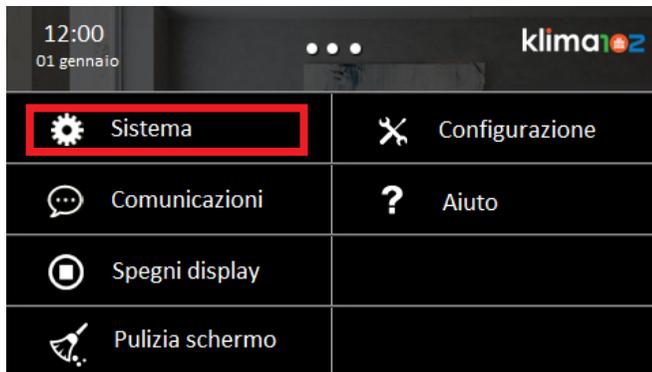

## IMPOSTAZIONE SPEGNIMENTO SCHERMO E SUONI

Per un risparmio energetico si consiglia di spegnere automaticamente lo schermo display.

Toccare la parte bassa del touch screen

Premere il pulsante Sistema

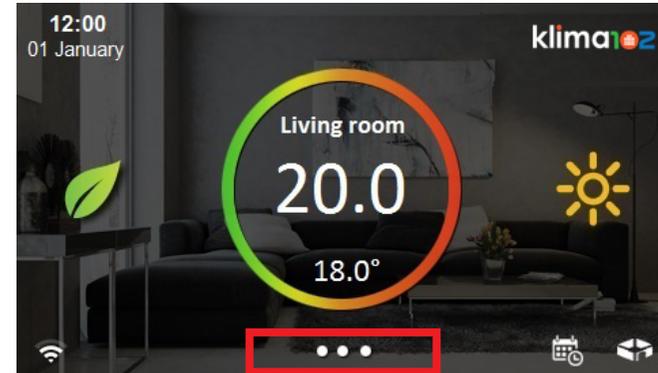

Premere Interfaccia utente

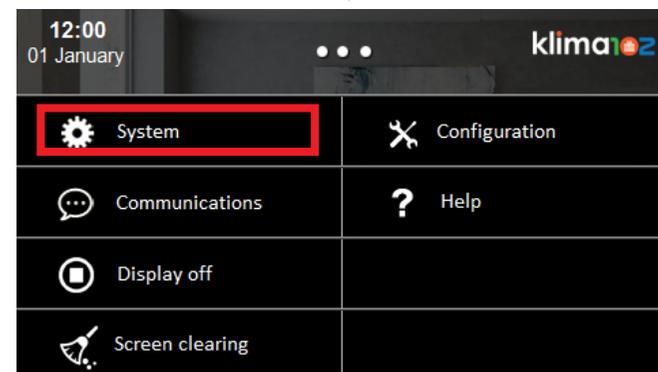

## SETTING SCREEN AND SOUND

To save energy you can set the automatic turn off the display.

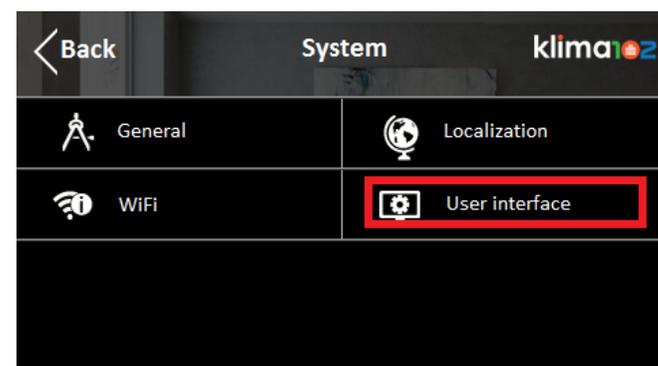

Touch the bottom of the screen

Press System

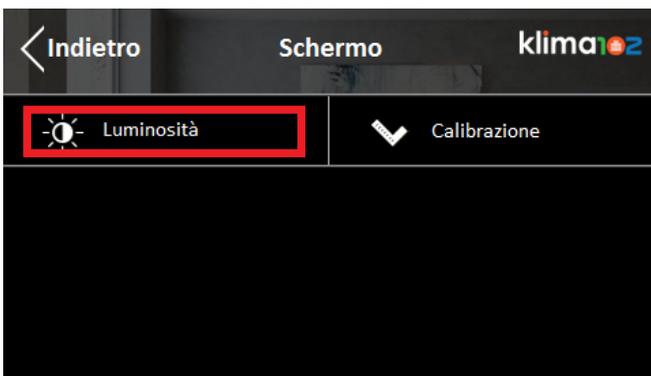

Press User interface

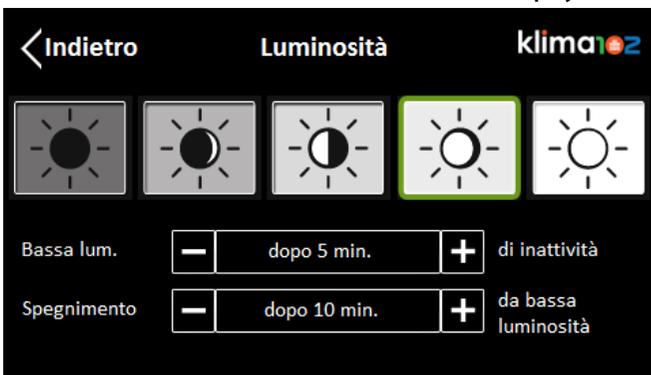

### Premere Schermo

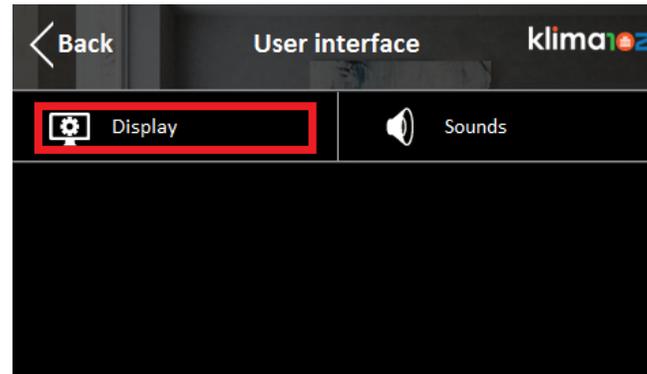

### Premere Luminosità

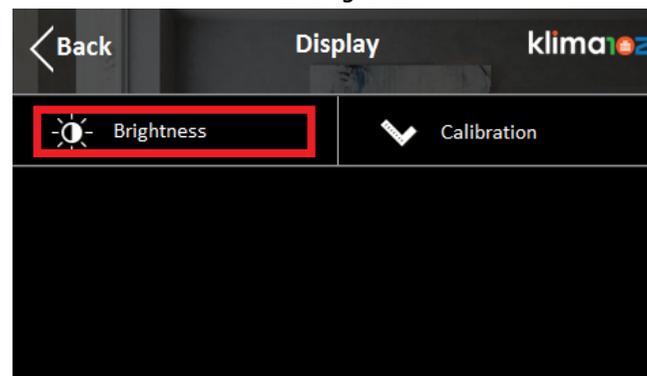

Con il tasto meno si abbassano i tempi di reazione della retroilluminazione e dell'accensione display

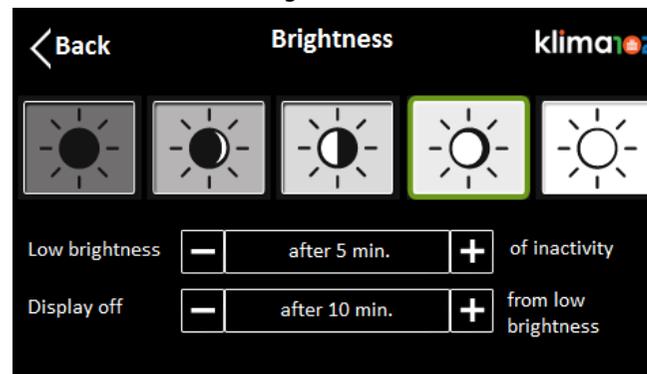

### Press Display

### Press Brightness

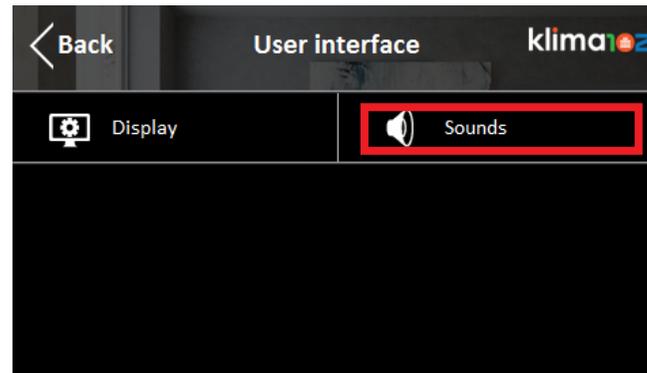

Set the brightness and the time

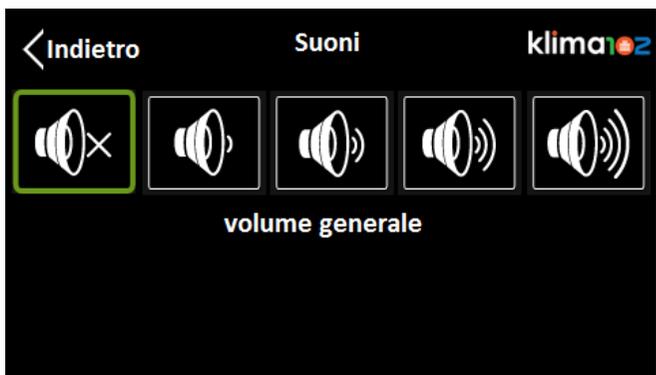

Tornare indietro fino ad Interfaccia utente e premere Suoni

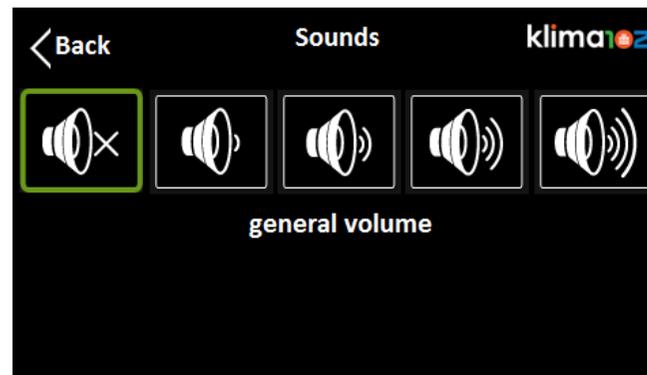

Turn back up to User interface and press Sounds

Selezionare la potenza del suono desiderata

Select the the desired volume

## FUNZIONI PRINCIPALI

Tocchando il modo della stanza nella schermata principale è possibile modificare il modo di funzionamento

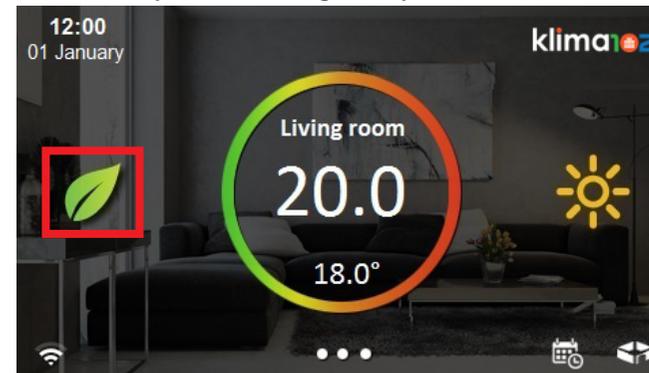

Per ogni singola stanza è possibile impostare una modalità di funzionamento desiderata (comfort, standby, eco) oppure la modalità manuale

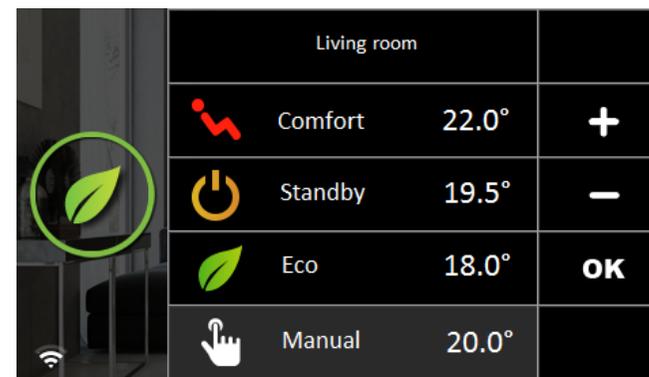

Tutte le forzature sono da ritenersi provvisorie, la funzione Crono è sempre "superiore" ed al cambio di modalità disabilita la forzatura.  
Inoltre, se il dispositivo si spegne a causa di una perdita di corrente, si disattivano le forzature e prevale la modalità Crono

## MAIN FUNCTIONS

By touching the room operation mode on the main screen is possible to change the operation mode

For every single room is possible to set a desired operation mode (comfort, standby, eco) or a manual mode

All setting are to be considered provisional, the Chrono function is always "higher" and the changing of mode disability forces.  
If the device loses current, the forcing stops and Chrono mode will active.

## PANORAMICA STANZE

Toccando il simbolo in basso a destra è possibile visualizzare rapidamente le temperature di tutte le stanze dell'abitazione

< Indietro **Panoramica stanze** klima02

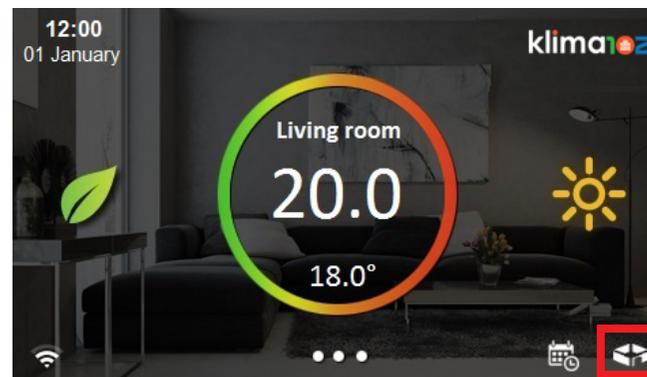

Soggiorno	22.0°	Cucina	22.0°
	22.0°		22.0°
Bagno	22.0°	Camera M	22.0°
	22.0°		22.0°

^

∨

## ROOMS OVERVIEW

By touching the symbol at the bottom right can be quickly displayed the temperatures of all the rooms in the house

< Back **Overview** klima02

Room 1	21.0°	Room 2	21.0°
	20.0°		20.0°
Room 3	21.0°	Room 4	21.0°
	20.0°		20.0°

^

∨

## MODIFICA UMIDITA' DEUMIDIFICATORE

Toccare la parte bassa del touch screen

Premere il pulsante Configurazione

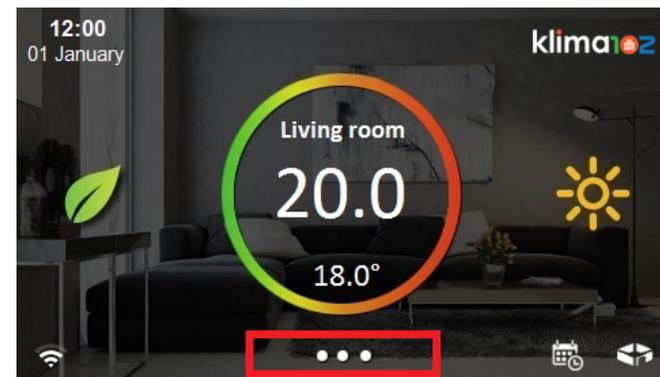

Entrare in Installazione

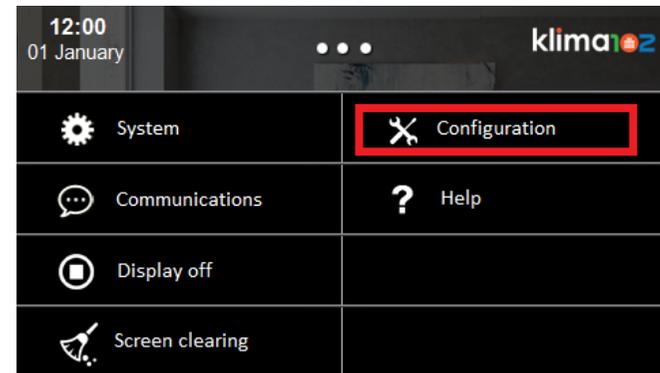

## CHANGE THE DEHUMIDIFICATOR HUMIDITY

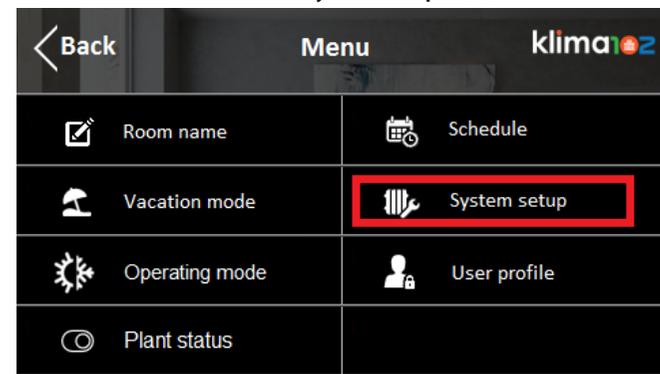

Touch the bottom of the screen

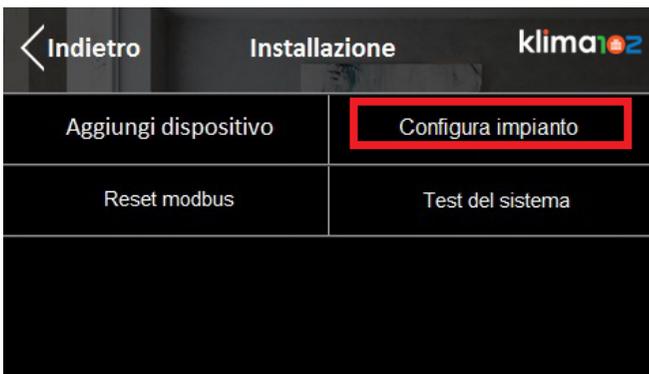

Press configuration

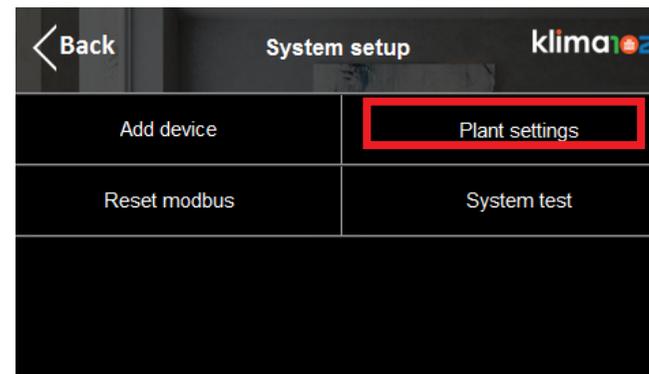

Press System setup

### Entrare in Configura Impianto

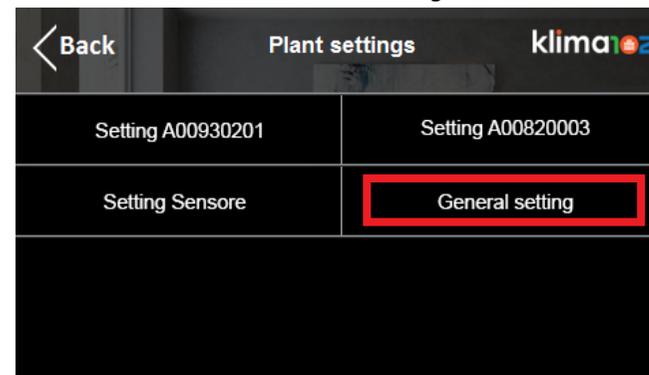

### Press Plant settings

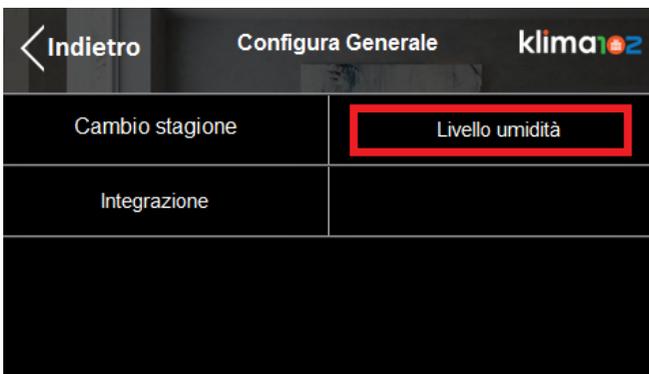

### Entrare in Configura Generale

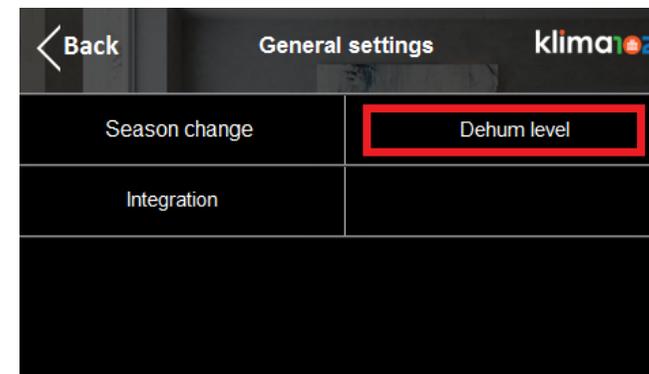

### Press General settings

### Entrare in Livello Umidità

### Press Dehum level

## MODIFICA SET INTEGRAZIONE

Toccare la parte bassa del touch screen

Premere il pulsante Configurazione

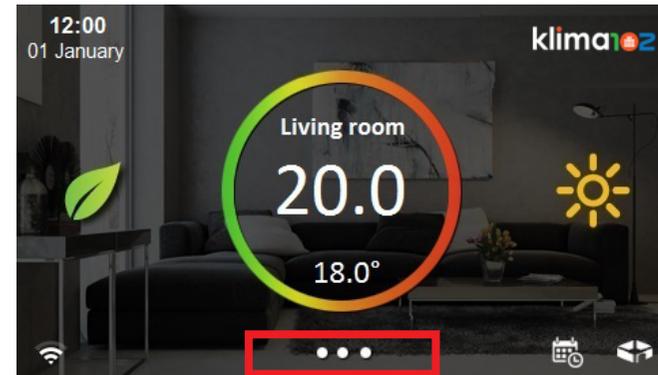

Entrare in Installazione

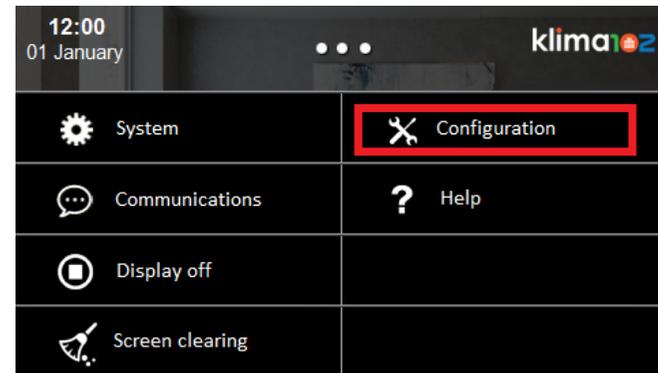

## CHANGE THE INTEGRATION SET

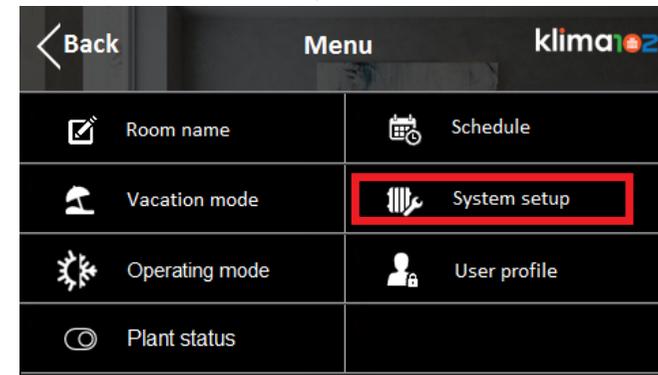

Touch the bottom of the screen

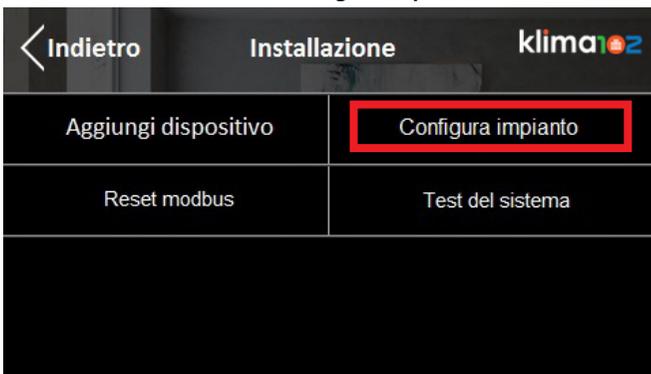

Press configuration

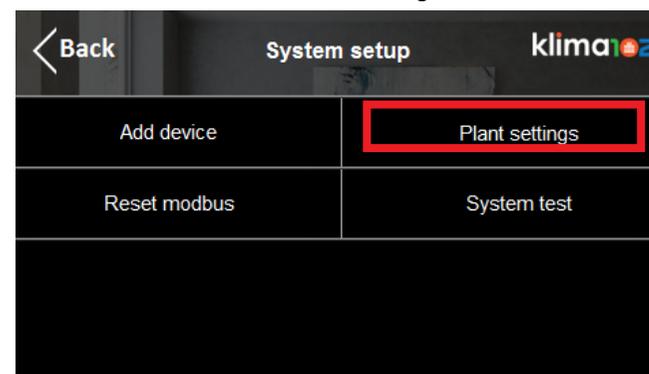

Press System setup

### Entrare in Configura Impianto

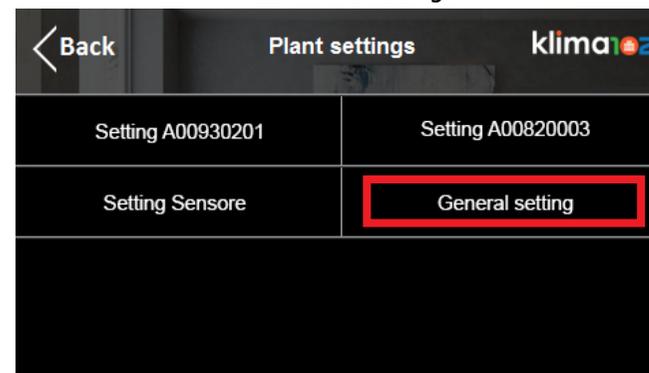

### Press Plant settings

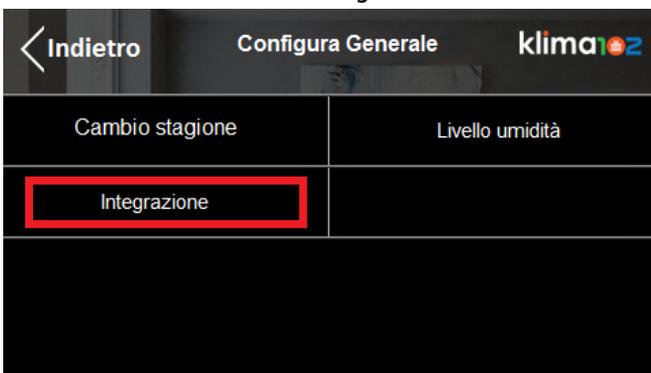

### Entrare in Configura Generale

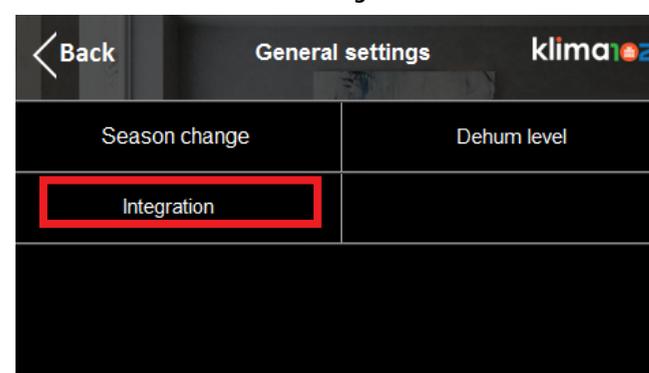

### Press General settings

### Entrare in Integrazione

### Press Integration

## MODIFICA CAMBIO STAGIONE AUTO O MANUALE

Toccare la parte bassa del touch screen

Premere il pulsante Configurazione

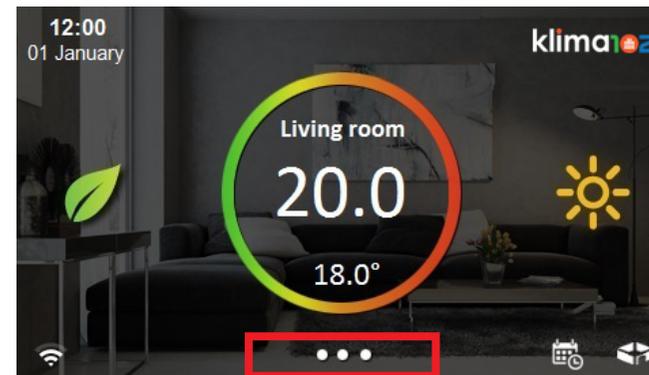

Entrare in Installazione

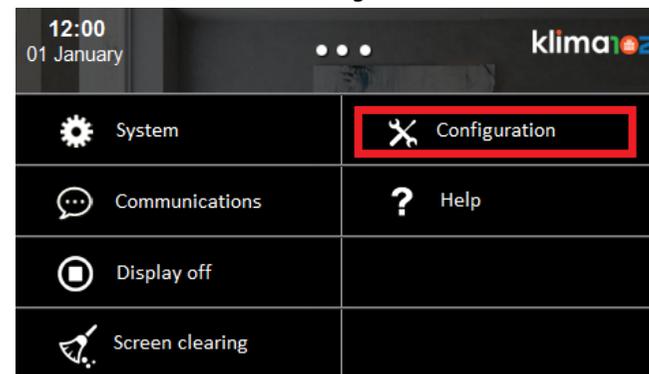

## CHANGE THE SEASON, AUTO OR MANUAL

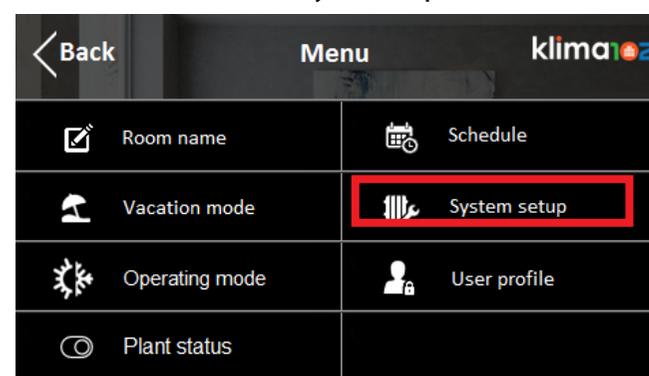

Touch the bottom of the screen

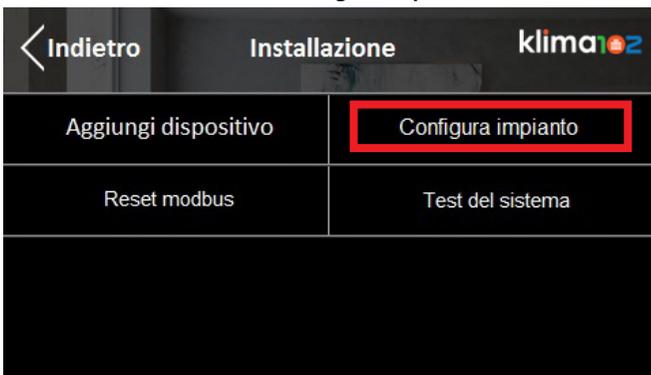

Press configuration

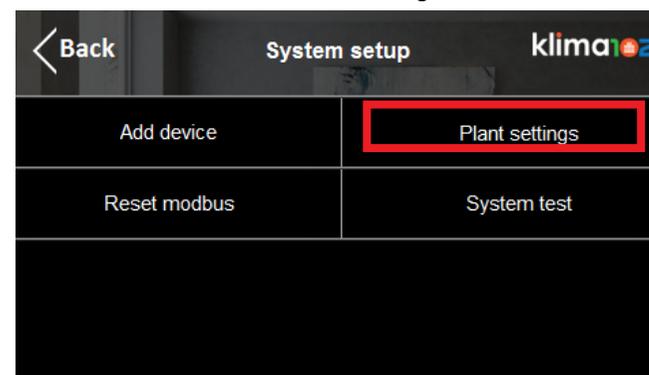

Press System setup

### Entrare in Configura Impianto

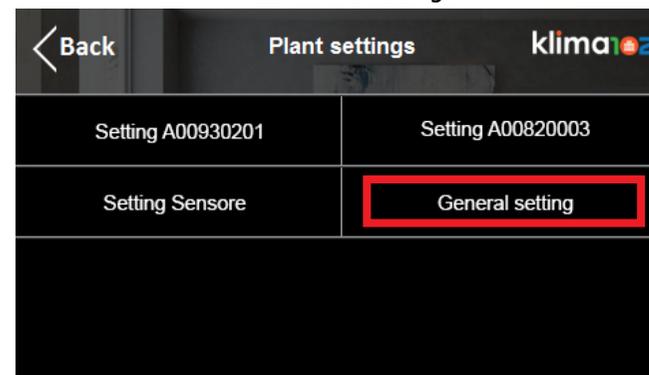

### Press Plant settings

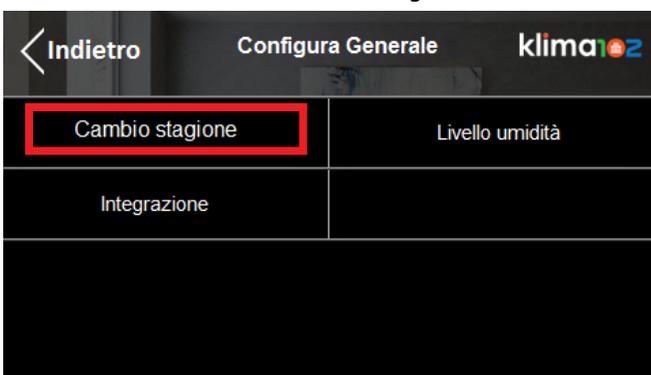

### Entrare in Configura Generale

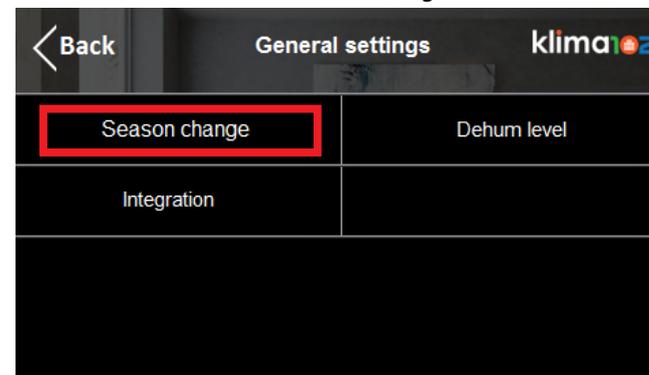

### Press General settings

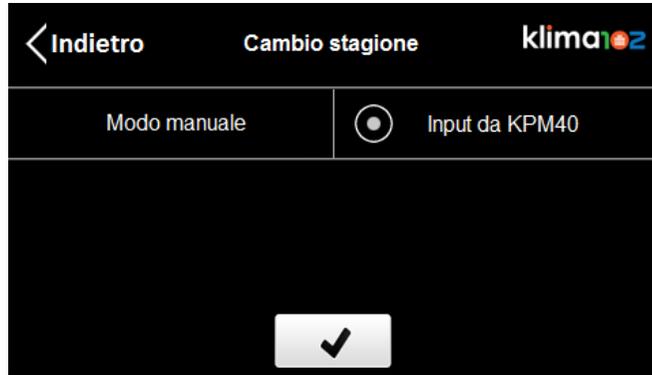

### Entrare in Cambio Stagione

### Press Season change

Scegliere il modo desiderato:  
manuale per impostare direttamente dal display A00910001 input per impostare  
da interruttore collegato al A00930201 BAse

Choose the desired operation:  
manual mode for setting directly from the display A00910001 input for setting through the  
button connected to the A00930201 BAse

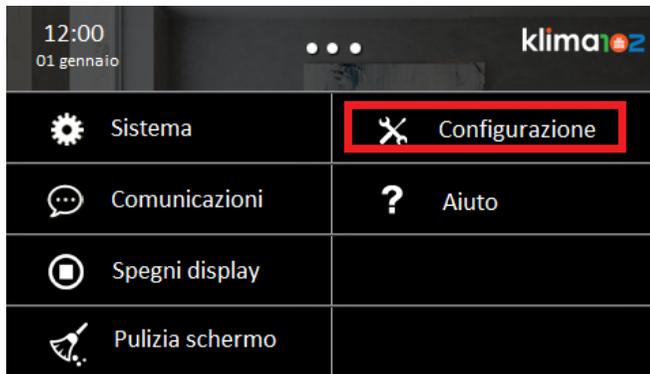

## MODIFICA TEMPO APERTURA VALVOLA MISCELATRICE

Toccare la parte bassa del touch screen

Premere il pulsante Configurazione

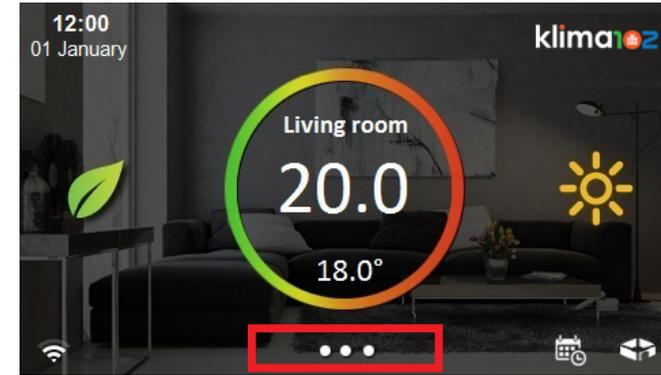

Entrare in Installazione

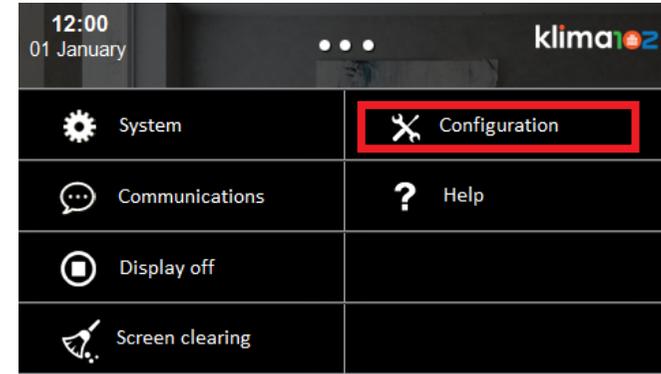

## CHANGE THE MIXING VALVE OPENING TIME

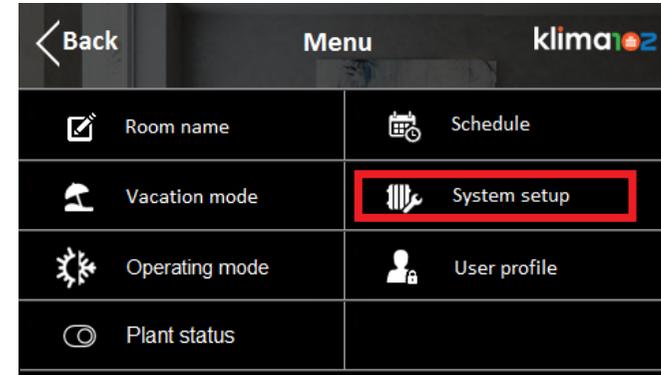

Touch the bottom of the screen

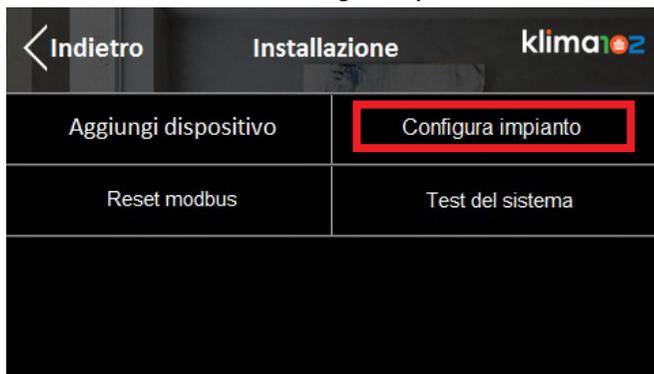

Press configuration

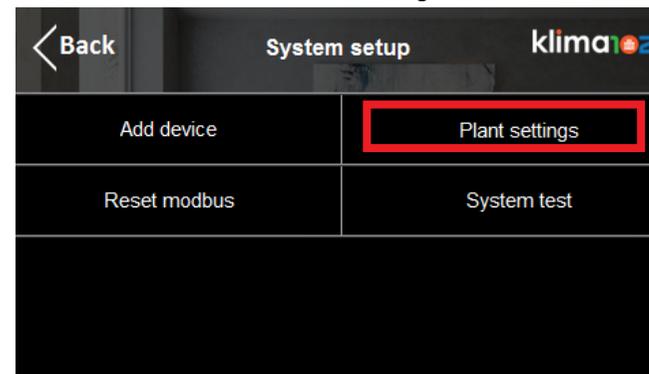

Press System setup

### Entrare in Configura Impianto

### Press Plant settings

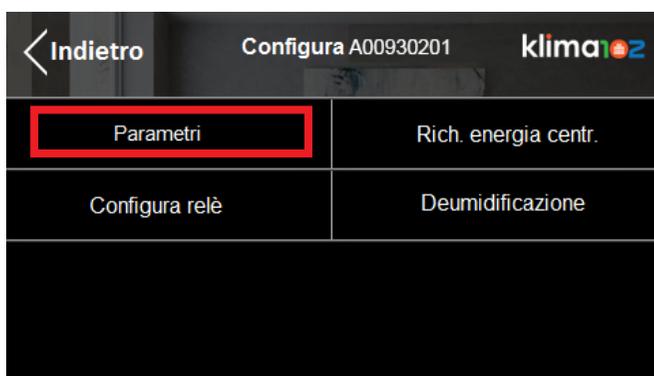

### Entrare in Configura KPM40

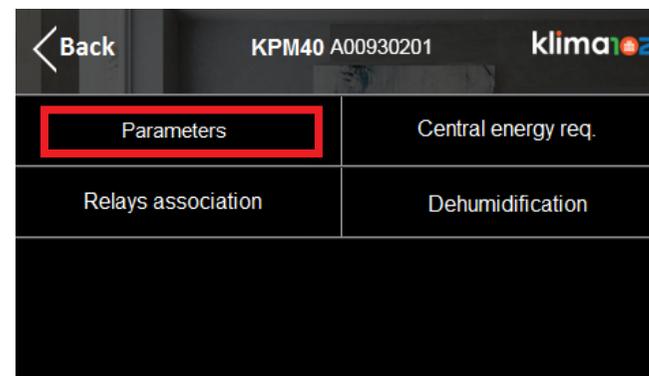

### Press KPM40 settings

### Entrare in Parametri

### Press Parameters

Selezionare il modulo A00930201 Base desiderato

Nei Parametri scegliere Miscelatrice

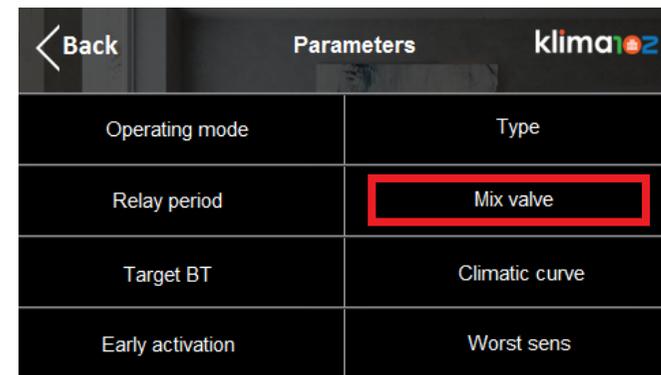

Premere Periodo Miscelatrice per impostare i secondi di apertura valvola

Select the desired A00930201 Base module

In Parameters choose Mix valve

Press Mix valve period to set the opening time

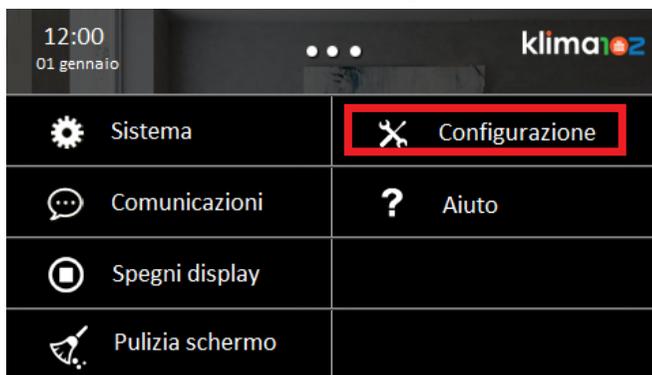

## MODIFICA PARAMETRI MACCHINE DELL'ARIA CON A00820003 Air

Toccare la parte bassa del touch screen

Premere il pulsante Configurazione

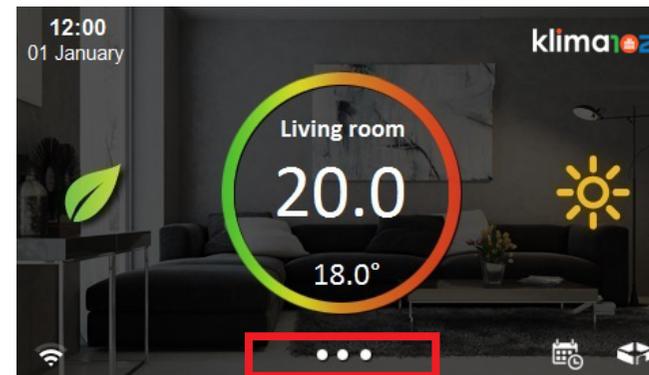

Entrare in Installazione

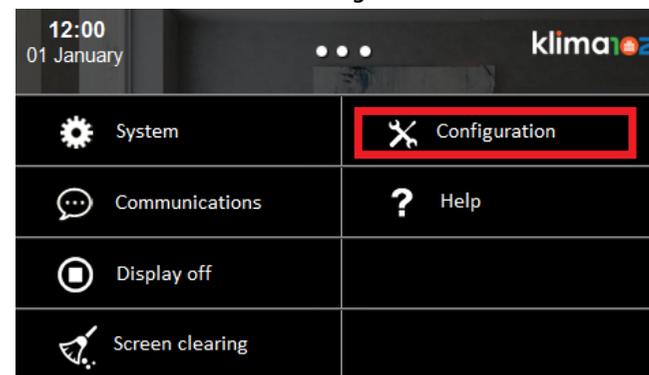

## CHANGE PARAMETERS OF AIR TREATMENT UNITS WITH A00820003 Air

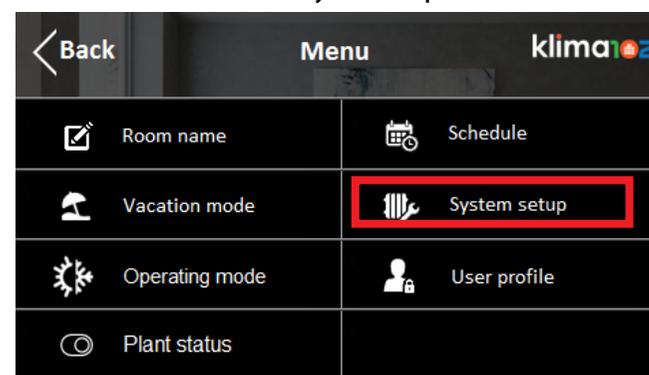

Touch the bottom of the screen

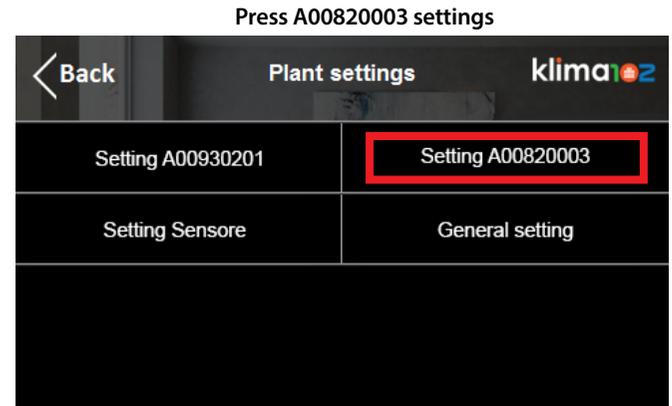

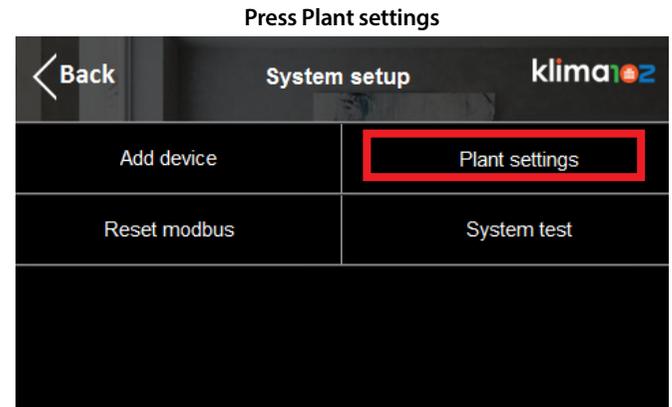

Press configuration

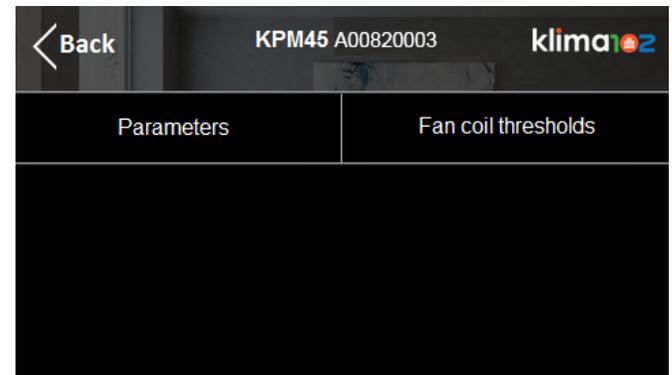

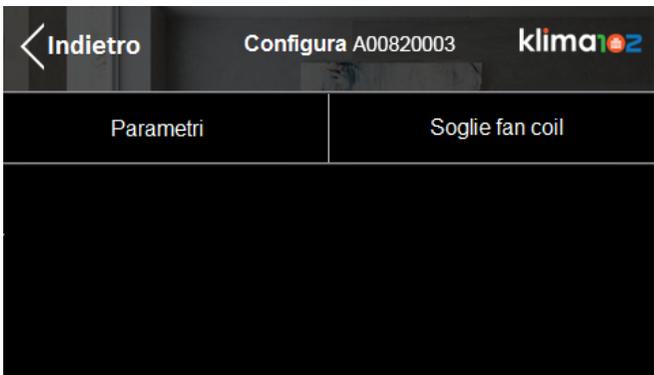

Press System setup

È possibile modificare gli offset delle 3 velocità dell'aria se si sta utilizzando un fan-coil oppure in Parametri è possibile analizzare altre informazioni

Is possible to change the offsets of the 3 air speeds if you are using a fan-coil or in Parameters you can analyze other information

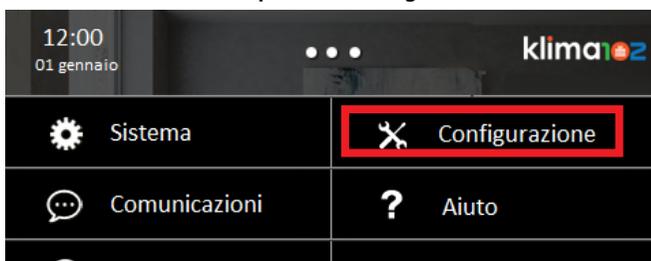

## RIPROGRAMMAZIONE DEL SISTEMA

Toccare la parte bassa del touch screen

Premere il pulsante Configurazione

Entrare in Stato Impianto

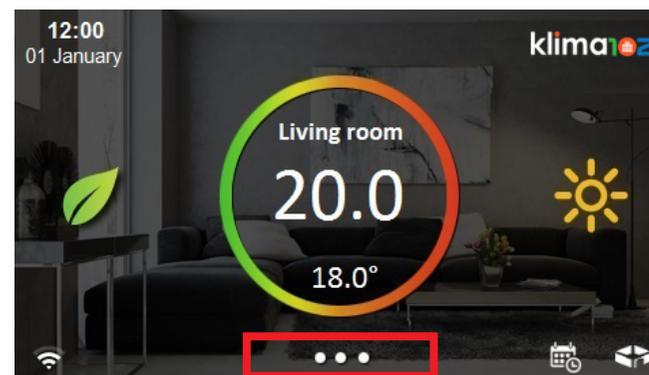

Mettere il sistema in modalità Spento

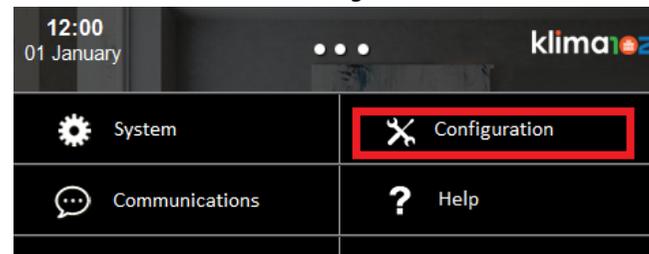

## REPROGRAMMING THE SYSTEM

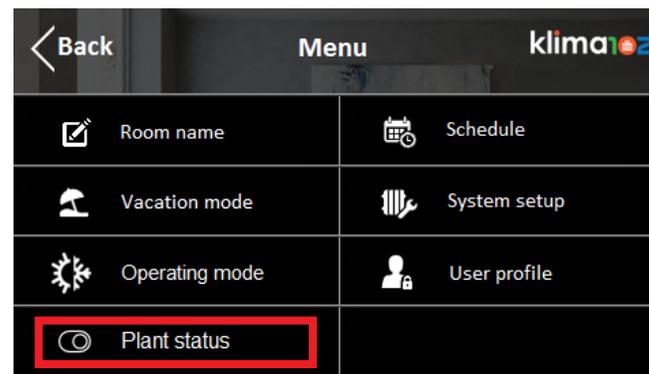

Touch the bottom of the screen

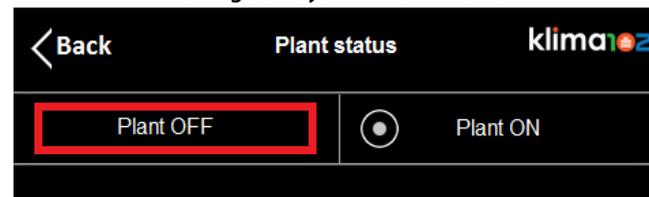

Press configuration

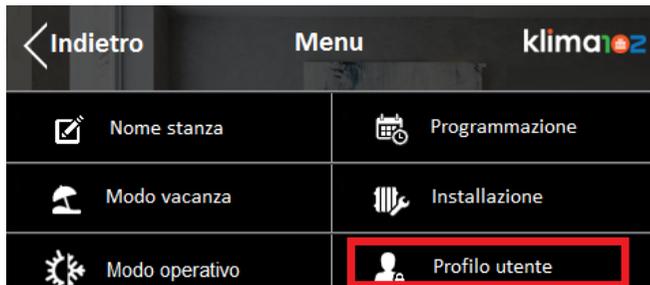

Press Plant status

Change the system in OFF mode

### Entrare in Profilo Utente

Inserire la password "411539" e premere OK

### Entrare in Installazione

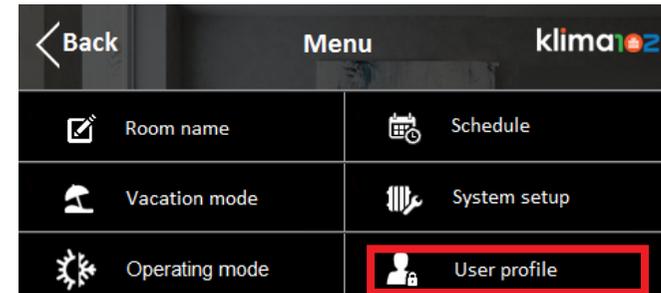

### Premere Reset Modbus

Adesso il sistema è completamente resettato ed è possibile ricominciare l'installazione di tutti i dispositivi

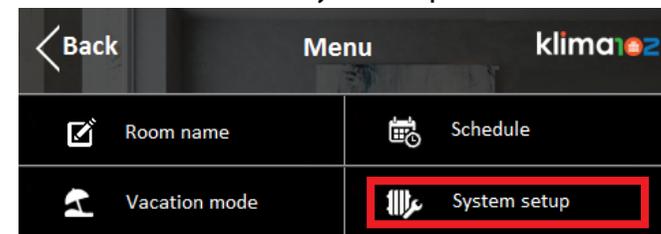

### Press User Profile

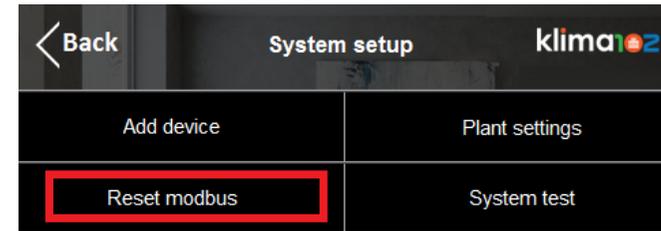

Insert the password "411539" and press OK

### Enter System Setup

### Press Reset Modbus

Now the system is completely reset and it is possible to restart the installation of all the devices

**AGGIUNGERE EXTENDER A00786001**  
Toccare la parte bassa del touch screen

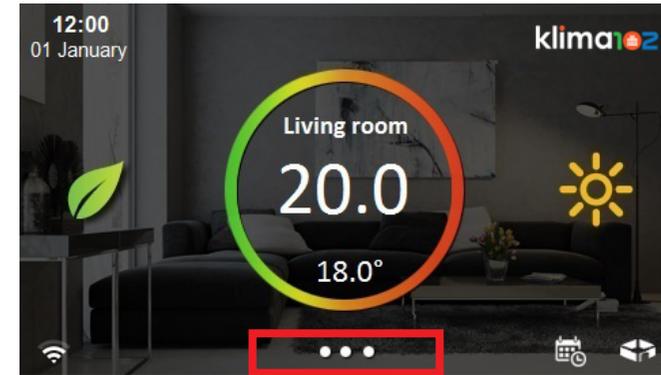

**Premere il pulsante Configurazione**

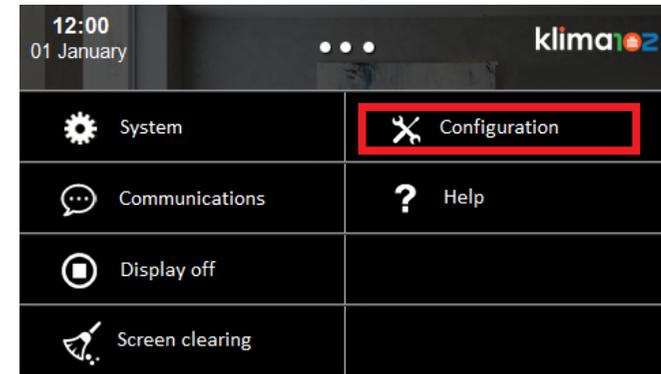

**Entrare in Installazione**

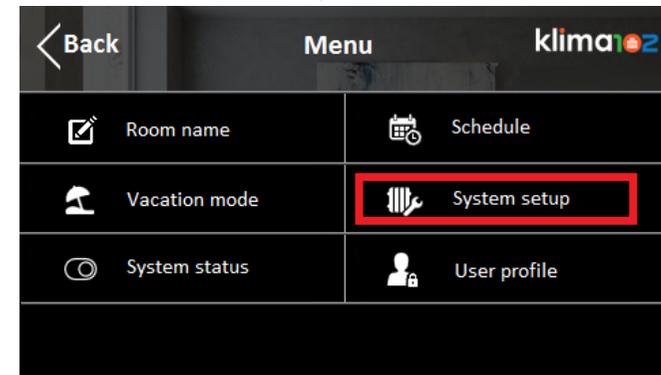

**ADDING THE EXTENDER A00786001**  
Touch the bottom of the screen

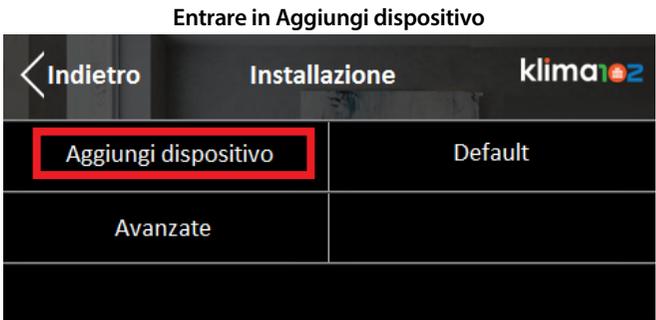

**Press Configuration**

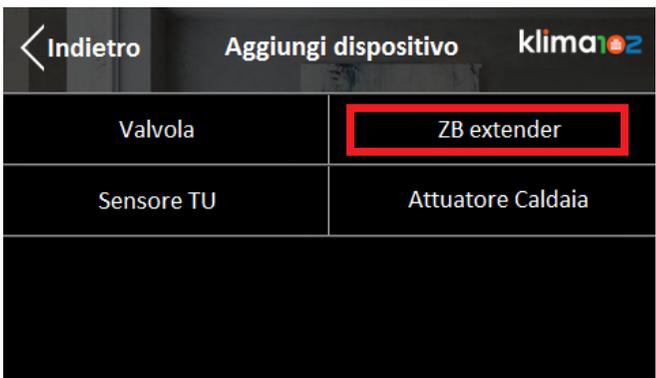

**Press System setup**

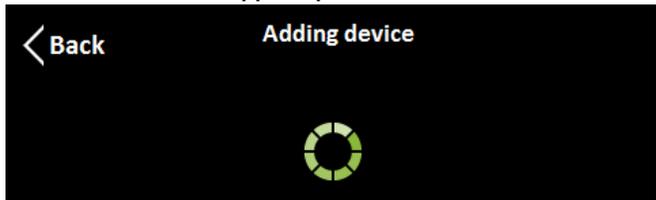

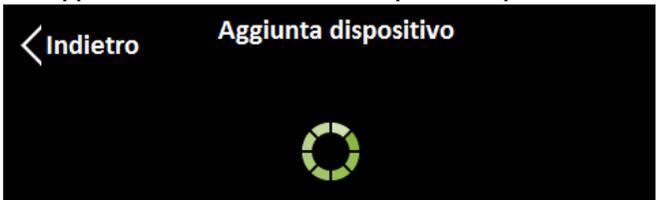

Se si dispone dell'Extender A00786001 si consiglia di installarlo prima delle valvole, selezionare ZB extender

If you have the Extender A00786001, install it before the valves, press ZB extender

Quando apparirà la schermata sottostante premere il pulsante del A00786001

When the below screen appears press the button on the A00786001

Mantenere premuto il pulsante fino a quando il led blu non inizia a lampeggiare (2 lampeggi-spenso / 2 lampeggi-spenso)

Hold the button until the blue LED starts flashing (2 blink-off – 2 blink-off)

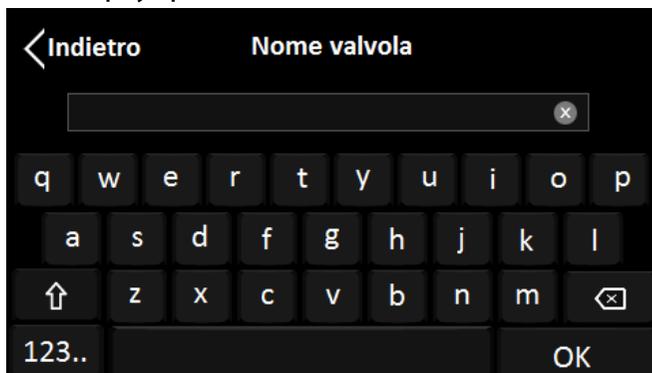

### AGGIUNGERE VALVOLA CRONOTERMOSTATO K470W

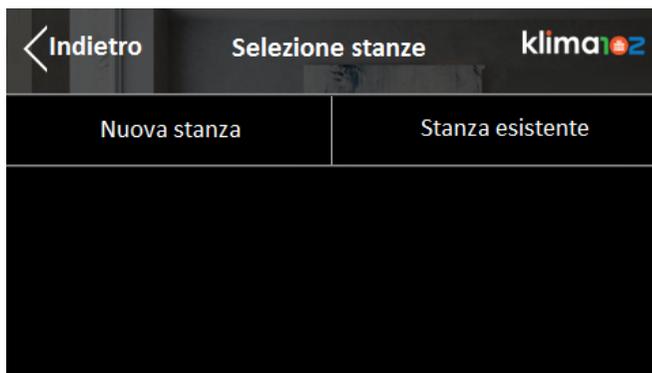

Per aggiungere una Valvola cronotermostato A00900001, selezionare Valvola

Sul display è possibile inserire il nome della valvola

Selezionare se la valvola è di una nuova stanza oppure di una stanza già creata

### ADDING CHRONOTHERMOSTAT VALVE K470W

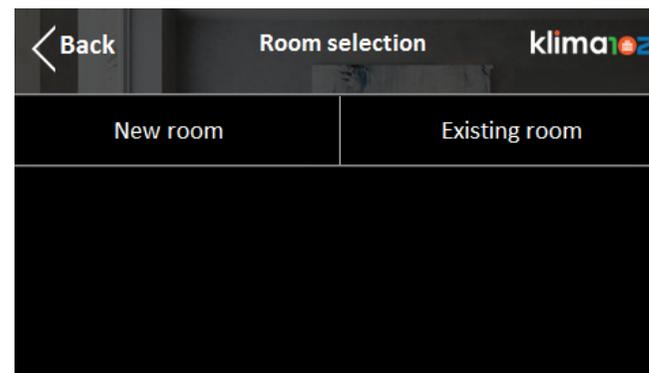

To add the A00900001 chronothermostat, press Valve

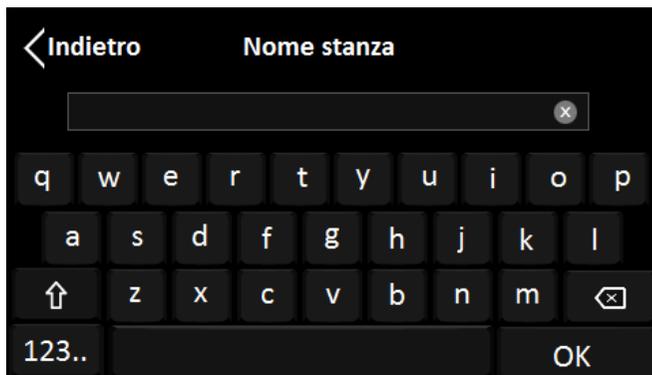

On the display you can enter the name of the valve

Select if the valve is in a new room or in an existing one

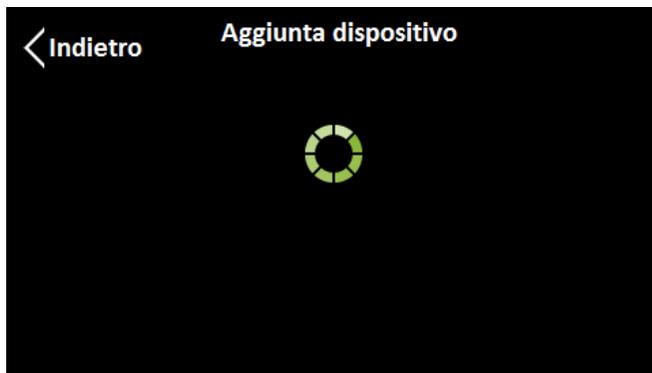

Se è una nuova stanza, inserire il nome della stanza

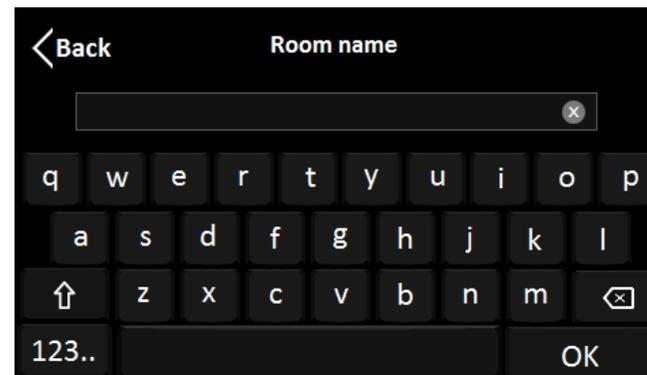

**i** È possibile associare più valvole per stanza che funzioneranno in sincrono

Quando apparirà la schermata sottostante, spostarsi sulla valvola A00900001, premere MENU, spostarsi con la rotella su PAIR e premere OK

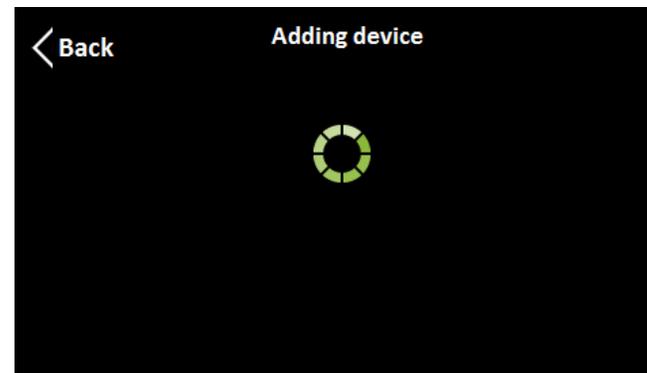

If the room is new, enter the name of the room

**i** You can associate multiple valves per room that will work in sync

When the below screen will appear, go to the A00900001 valve, press MENU, move the wheel on PAIR and press OK

Sulla valvola K470W apparirà la scritta JOIN, quindi premere OK

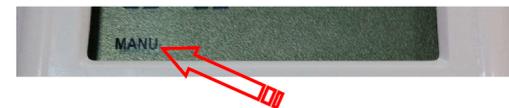

On the K470W valve will appear JOIN, then press OK

Ad operazione conclusa apparirà la scritta OK, altrimenti Err

When the operation will be completed will appear OK, otherwise Err

Attendere che sul display appaia la scritta MANU. Se non appare togliere e reinserire le batterie fino a quando non appare la scritta MANU.

Se dopo aver collegato la valvola n° 7 non si riesce a collegare altre valvole significa che sono tutte associate direttamente al display senza passare dall'Extender A00786001. Il display ha un limite di 8 dispositivi connessi.

Si consiglia di spegnere il display e attendere 5 minuti che le valvole si associno in automatico all'Extender A00786001.

Se il problema persiste si consiglia di togliere le batterie dalle valvole, attendere 20 sec e reinserire le batterie ripetendo il ciclo di adattamento e attendendo le icone della connessione e la scritta MANU.

Quindi riprovare ad aggiungere ulteriori valvole al display.

Wait the written MANU on the display, if it will not appear then remove and replace the batteries until it appears.

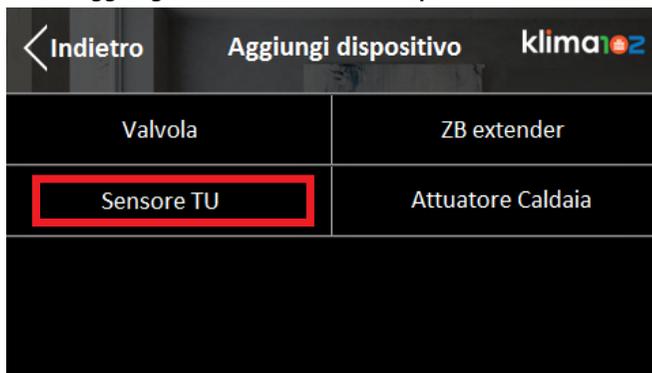

If after the valve No. 7 you are unable to connect other valves, it means that they are all acciociate directly to the display without passing from the A00786001 extender. The display has a limit of No. 8 valves.

It is advisable to turn off the display and wait 5 minutes that the valves will automatic associate to the Extender. If the problem persists it is advisable to remove the batteries from the valves, wait 20 sec., replace the batteries by repeating the adaptation procedure and wait for the icons of the connection and the written MANU. Then try to add additional valves to the display.

### AGGIUNGERE SONDA AMBIENTE K410W

Per aggiungere una sonda ambiente, premere Sensore TU

Sul display A00800001 è possibile inserire il nome del sensore

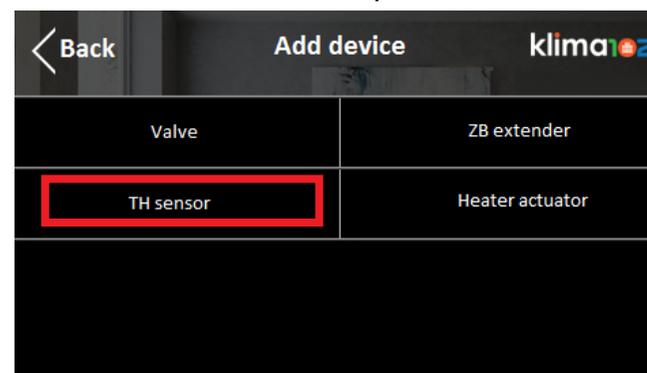

Selezionare se la valvola è di una nuova stanza oppure di una già creata

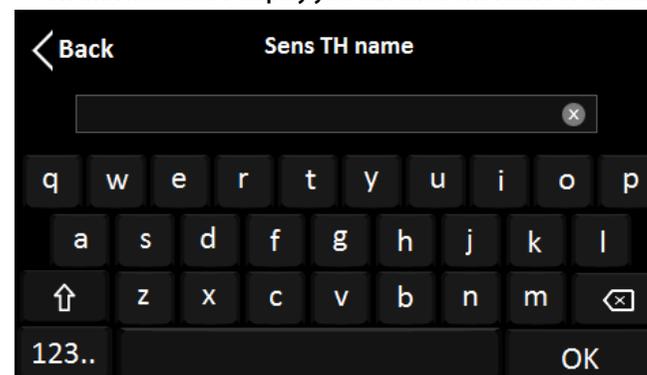

### ADDING THE TH SENSOR K410W

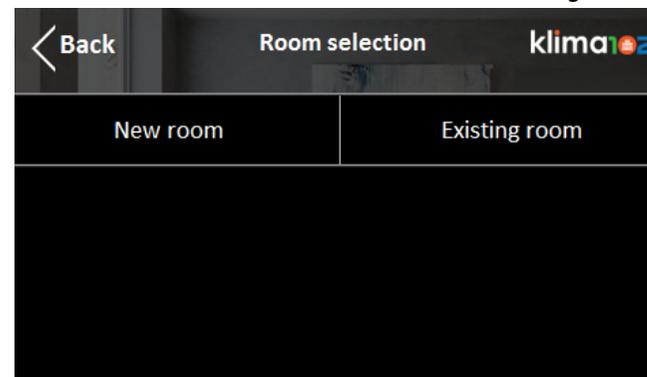

To add a room sensor, press TH Sensor

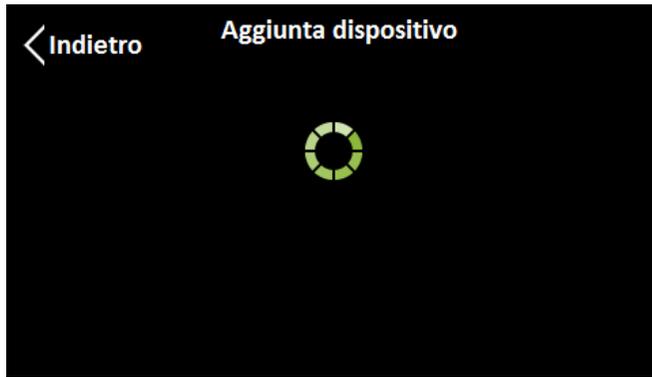

On the A00800001 display you can enter the name of the sensor

Select if the sensor is in a new room or in an existing one

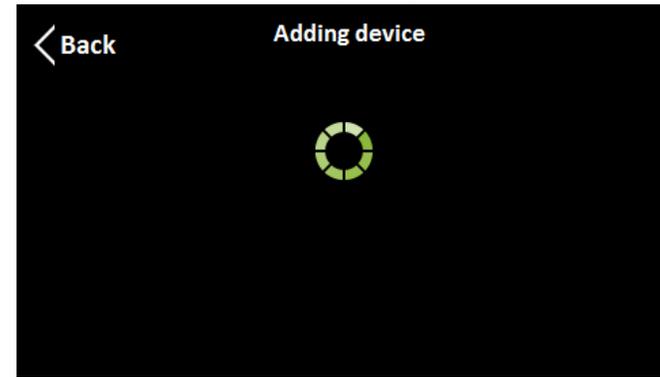

Quando apparirà la schermata sottostante, spostarsi sul sensore ambiente

Preme il pulsante sul sensore ambiente per attivare il dispositivo, premere una seconda volta per attivare la ricerca dispositivo

When the below screen will appear, go to the sensor

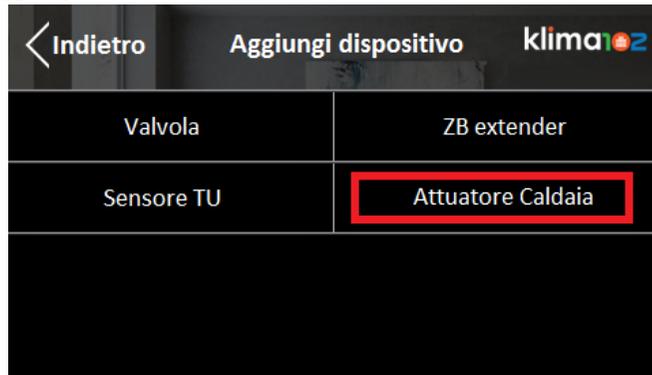

Press the sensor button to activate the device, press a second time to activate the device searching

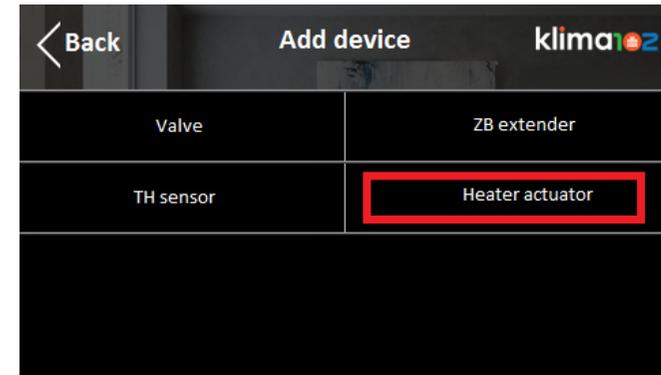

### AGGIUNGERE ATTUATORE CALDAIA A00850101

Per aggiungere un attuatore caldaia A00850101, premere Attuatore caldaia

### ADDING THE HEATER ACTUATOR A00850101

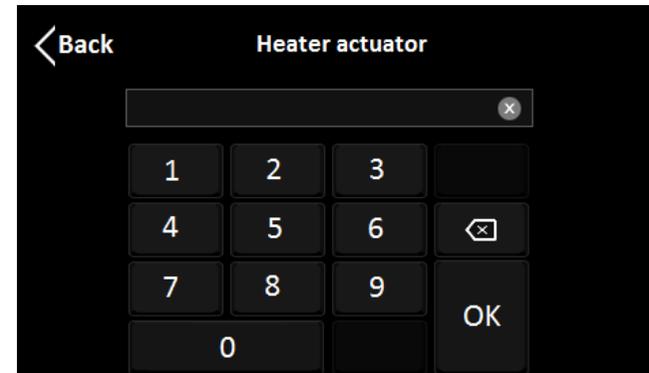

To add a A00850101 boiler actuator, press Heater actuator

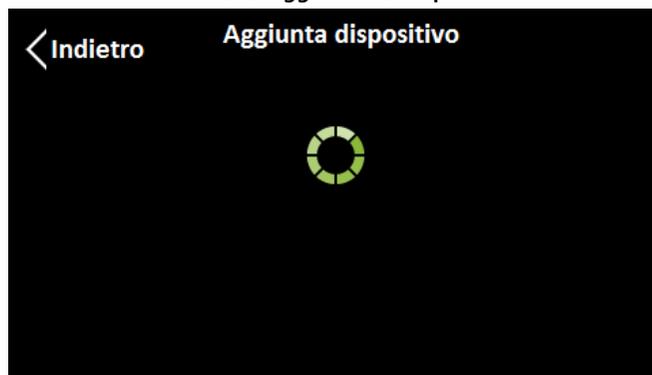

Inserire il codice seriale riportato sull'attuatore caldaia A00850101 e attendere l'aggiunta del dispositivo

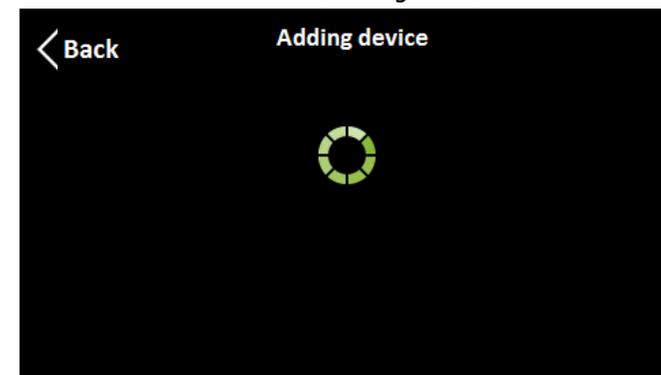

Enter the serial code on the A00850101 heater actuator and wait for device adding

Attendere l'aggiunta del dispositivo

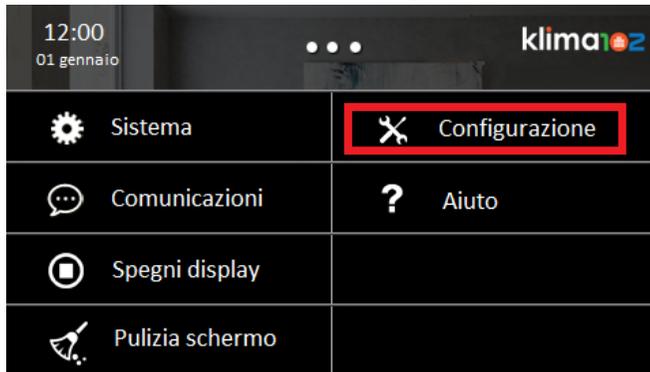

Wait for the adding device

## FUNZIONI PRINCIPALI

Tocchando il modo della stanza nella schermata principale è possibile modificare il modo di funzionamento

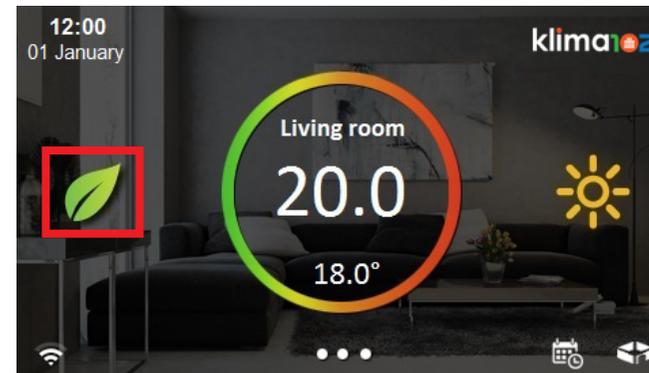

Per ogni singola stanza è possibile impostare una modalità di funzionamento desiderata (comfort, standby, eco) oppure la modalità manuale

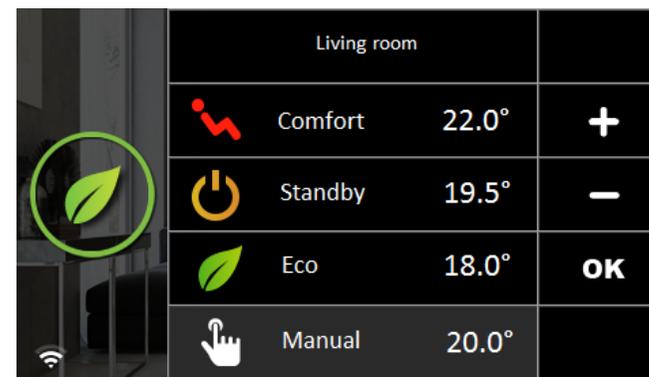

Tutte le forzature sono da ritenersi provvisorie, la funzione Crono è sempre "superiore" ed al cambio di modalità disabilita la forzatura.  
Inoltre, se il dispositivo si spegne a causa di una perdita di corrente, si disattivano le forzature e prevale la modalità Crono

## MAIN FUNCTIONS

By touching the room operation mode on the main screen is possible to change the operation mode

For every single room is possible to set a desired operation mode (comfort, standby, eco) or a manual mode

All settings are to be considered provisional, the Chrono function is always "higher" and the changing of mode disables forcing.  
If the device loses current, the forcing stops and Chrono mode will activate.

## PANORAMICA STANZE

Toccando il simbolo in basso a destra è possibile visualizzare rapidamente le temperature di tutte le stanze dell'abitazione

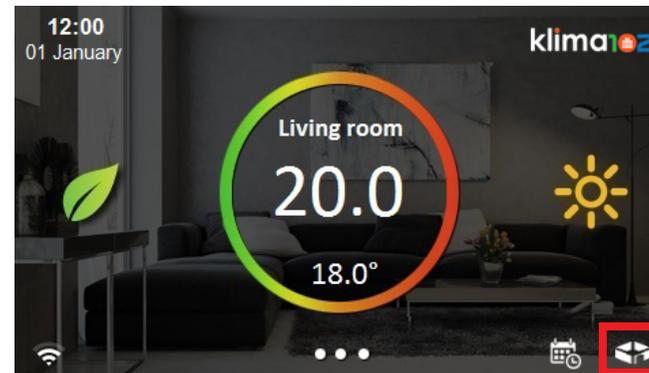

The screenshot shows the 'Panoramica stanze' screen. It features a back arrow labeled 'Indietro' and the klima102 logo. The room temperatures are displayed in a table format:

Soggiorno	22.0°	Cucina	22.0°
	22.0°		22.0°
Bagno	22.0°	Camera M	22.0°
	22.0°		22.0°

The temperatures 22.0° are highlighted in red. A back arrow is visible at the bottom left, and a downward arrow is at the bottom right.

## ROOMS OVERVIEW

By touching the symbol at the bottom right can be quickly displayed the temperatures of all the rooms in the house

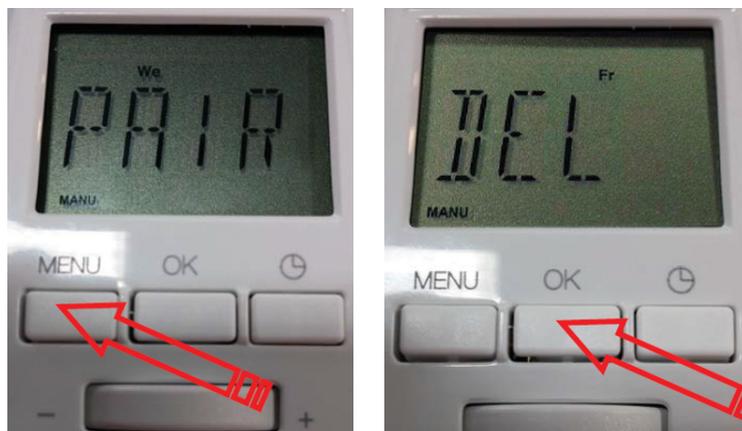

The screenshot shows the 'Overview' screen. It features a back arrow labeled 'Back' and the klima102 logo. The room temperatures are displayed in a table format:
